

# **Intelligent Battery Power System Ibps**

Battery Management Systems (BMS) BMS means different things to different people. To some it is simply Battery Monitoring, keeping a check on the key operational parameters during charging and discharging such as voltages and currents and the battery internal and ambient temperature.

The Intelligent Battery

and Power System (IBPS) allows designers to add Smart rechargeable Lithium-Ion (Li-Ion) battery power as an OEM component in computers, electronic equipment and electromechanical devices. The IBPS serves as the complete AC/DC power supply.

**Intelligent Battery Power System Ibps**  
**The Intelligent Battery**

*Page 2/43*

and Power System (IBPS) is a fully autonomous scalable power management system that manages all aspects of powering a system with battery power. It handles the power switching between battery power and power from an external supply along with all aspects regarding charging and discharging of the batteries.

**Intelligent Battery and Power System™ - OceanServer**

*Page 3/43*

The Intelligent Battery and Power System (IBPS) is a fully engineered sub-system for OEM and embedded applications, based on scalable 'building blocks'. It provides battery power or acts as a battery back-up sub-system using Lithium-Ion or Nickel Metal Hydride Smart Batteries.
