John Deere New Generation and Generation II Tractors
The Timber Producer

In the 1960s and 1970s, John Deere's tractors evolved dramatically from small machines into large, powerful tractors with modern advances and

muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations.

Ranging from simple model variations to those machines built for specific purposes, this industrial-grade volume chronicles the "other line" of John Deere machinery. A mainstay in heavy industry and construction sites throughout the world, John Deere Industrials begins with coverage of the popular A-series with its yellow paint and the letter "I" added to the model designation that has become the hallmark of these incredible machines.
