A noted attorney gives detailed instructions on winning arguments, emphasizing such points as learning to speak with the body, avoiding being blinding by brilliance, and recognizing the power of words as a weapon.

This compelling history brings to life the watershed year of 1948, when the United States reversed its long-standing position of political and military isolation from Europe and agreed to an entangling alliance with ten European nations. Not since 1800, when the United States ended its alliance with France, had the nation made such a commitment. The historic North Atlantic Treaty was signed on

April 4, 1949, but the often-contentious negotiations stretched throughout the preceding year. Lawrence S. Kaplan, the leading historian of NATO, traces the tortuous and dramatic process, which struggled to reconcile the conflicting concerns on the part of the future partners. Although the allies could agree on the need to cope with the threat of Soviet-led Communism and on the vital importance of an American association with a unified Europe, they differed over the means of achieving these ends. The United States had to contend with domestic isolationist suspicions of Old World intentions, the military's worries about over extension of the nation's resources, and the apparent incompatibility of the projected treaty

with the UN charter. For their part, Europeans had to be convinced that American demands to abandon their traditions would provide the sense of security that economic and political recovery from World War II required. Kaplan brings to life the colorful diplomats and politicians arrayed on both sides of the debate. The end result was a remarkably durable treaty and alliance that has linked the fortunes of America and Europe for over fifty years. Despite differences that have persisted and occasionally flared over the past fifty years, NATO continues to bind America and Europe in the twenty-first century. Kaplan's detailed and lively account draws on a wealth of primary sources--newspapers, memoirs, and diplomatic

documents--to illuminate how the United States came to assume international obligations it had scrupulously avoided for the previous 150 years.

about the importance of sweating the small stuff in our lives and in our careers. Our smallest actions and gestures often have outsized impact on our biggest goals, say Linda Kaplan Thaler and Robin Koval. Did you double-check that presentation one last time, or hold the elevator for a stranger? Going that extra inch - whether with a client, customer, family member, or friend - speaks volumes to others about our talent, personality, and motivations. After all, if we can't take care of the small details, how can we be counted on to deliver when it really matters? In today's challenging times, bigger isn't always better. In fact, it's often the baby steps that put us on the path to delivering a true competitive advantage. The real secret to getting ahead in life and in our careers is to refocus our attention on

the small details that, if disregarded, can sabotage a multimillion-dollar ad campaign or undermine your most important relationships. Kaplan Thaler and Koval show how to get more of what you want with surprisingly less than you'd imagine. Written in the same entertaining, story-driven style that made *The Power of Nice* the go-to book for finishing first, *The Power of Small* demonstrates how all of us can harness the power of small to improve and reinvent our lives. It's the ultimate guide to shrinking your outlook to broaden your horizons. Get SMALL and get going!

NEW YORK TIMES BESTSELLER •

In this “ambitious and challenging” (The New York Review of Books) work, the bestselling author of *Monsoon and Balkan Ghosts* offers a revelatory prism through which to view global upheavals and to understand what lies ahead for continents and countries around the world. In *The Revenge of Geography*, Robert D. Kaplan builds on the insights, discoveries, and theories of great geographers and geopolitical thinkers of the near and distant past to look back at critical pivots in history and then to look forward at the evolving

global scene. Kaplan traces the history of the world's hot spots by examining their climates, topographies, and proximities to other embattled lands. The Russian steppe's pitiless climate and limited vegetation bred hard and cruel men bent on destruction, for example, while Nazi geopoliticians distorted geopolitics entirely, calculating that space on the globe used by the British Empire and the Soviet Union could be swallowed by a greater German homeland. Kaplan then applies the lessons learned to the present crises in Europe, Russia, China, the Indian subcontinent, Turkey, Iran, and the Arab Middle East. The result is a holistic interpretation of the next cycle of conflict throughout Eurasia. Remarkably, the future can be understood in the context of

temperature, land allotment, and other physical certainties: China, able to feed only 23 percent of its people from land that is only 7 percent arable, has sought energy, minerals, and metals from such brutal regimes as Burma, Iran, and Zimbabwe, putting it in moral conflict with the United States.

Afghanistan's porous borders will keep it the principal invasion route into India, and a vital rear base for Pakistan, India's main enemy. Iran will exploit the advantage of being the only country that straddles both energy-producing areas of the Persian Gulf and the Caspian Sea. Finally, Kaplan posits that the United States might rue engaging in far-flung conflicts with Iraq and Afghanistan rather than tending to its direct neighbor Mexico, which is on the verge of becoming a semifailed state due to drug cartel carnage. A

brilliant rebuttal to thinkers who suggest that globalism will trump geography, this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms.

the decades to come. This book is about human behavior and, more particularly, about a class of human behaviors—those behaviors by people that have themselves as the object of their behaviors. These self-referent behaviors are social in nature in the sense that in large measure, they are the outcomes of pervasive social processes and are themselves major influences on social outcomes. As such, self-

referent behaviors have the potential to be significant organizing constructs in the study of the broader field of social psychology. In any case, they are regarded here as of intrinsic interest and are the focus of this volume. Four broad categories of self-referent behaviors are considered with regard to their social bases and consequences as these are revealed in the social psychological and sociological

literature. With appropriate discriminations made within each group ing, the four categories are: self-conceiving, self-evaluating, self-feeling, and self-protective-self-enhancing responses. Following a consideration of the social antecedents and consequences of each category of self referent behaviors, I present a final summary statement that outlines a theoretical model of the additive and

interactive social influences on and consequences of the mutually influential self-referent behaviors. The outline of the theoretical model reflects my synthesis of the apparently relevant theoretical and empirical literature and is intended to function as a framework for the orderly incorporation of new theoretical assertions and more or less apparently relevant empirical associations. The only comprehensive

and up-to-date look at Reform Judaism, this book analyzes the forces currently challenging the Reform movement, now the largest Jewish denomination in the United States. As an unintended result of its success, the movement now struggles with an identity crisis brought on by its liberal theology. Kaplan asks, can Reform Judaism continue to thrive? Can it be broadly inclusive and still be uniquely and authentically

Jewish? Addressing the issues that have confronted the movement including the ordination of women, acceptance of homosexuality, the problem of assimilation, the.

The Indian Ocean and the Future of American Power

The Power of Small The Power of Reading Harness the Power of Surprise for Business Breakthroughs

On the world maps common in America, the Western Hemisphere lies front and center, while the Indian Ocean region all but disappears. This convention reveals the geopolitical focus of the now-departed twentieth century, but in the twenty-first century that focus will fundamentally change. In this pivotal examination of the countries known as “ Monsoon Asia ” —which include India, Pakistan, China, Indonesia, Burma, Oman, Sri Lanka, Bangladesh, and

Tanzania—bestselling author Robert D. Kaplan shows how crucial this dynamic area has become to American power. It is here that the fight for democracy, energy independence, and religious freedom will be lost or won, and it is here that American foreign policy must concentrate if the United States is to remain relevant in an ever-changing world. From the Horn of Africa to the Indonesian archipelago and beyond, Kaplan exposes the effects of population growth, climate change, and extremist politics on this unstable region, demonstrating why Americans can no longer afford to ignore this important area of the

world.

Presents the basic logic behind proper English usage, showing how to improve grammar and sentence structure.

“ Leapfrogging is as much about the secrets of breakthrough leadership as it is about business innovation . . . loaded with fresh ideas and examples. ” —Hans Middag, Director, Learning and Development, Randstad

In his trailblazing debut, Soren Kaplan gives business leaders the tools to do exactly what they ’ re taught to avoid: embrace surprise—the new key to business breakthroughs. Instead of fighting against uncertainty, Kaplan reveals how to

use it to break down limiting mindsets and barriers to change the game. By highlighting specific ways to transform both good and bad surprises into unique opportunities, Kaplan encourages leaders to compete by embracing counterintuitive ideas, managing paradoxes, and even welcoming failure. This is the key to “leapfrogging” —creating or doing something radically new or different that produces a significant leap forward. Leapfrogging connects new research, unconventional strategies, and practical tools for navigating the “messy” and elusive process of achieving business breakthroughs. Filled with real-

world examples from innovators such as Gatorade, Intuit, Philips, Kimberly-Clark, Colgate-Palmolive, OpenTable, and Etsy, Kaplan shows that any organization or business function can leapfrog. Using his LEAPS process (Listen, Explore, Act, Persist, and Seize), leaders learn to seek out, recognize, and respond to surprising experiences and events as a way to create solutions that leap beyond the current expectations of customers, partners, employees, the market, and the competition. Kaplan's Leapfrogging is the new handbook for the modern leader. "Superbly crafted, powerful in its simplicity, offering smart, actionable learning .

. . . Finally, a simple, holistic model that allows for breakthrough thinking and living. ” —Mary Beth Robles, Vice President, Colgate-Palmolive “ His campaigning for fearless innovation and flexibility is compelling. ” —Publishers Weekly “ [An] elegantly layered exploration of Europe ’ s past and future . . . a multifaceted masterpiece. ” —The Wall Street Journal “ A lovely, personal journey around the Adriatic, in which Robert Kaplan revisits places and peoples he first encountered decades ago. ” —Peter Frankopan, author of *The Silk Roads* ONE OF THE BEST BOOKS OF THE YEAR: The New Yorker In this insightful

travelogue, Robert D. Kaplan, geopolitical expert and bestselling author of *Balkan Ghosts* and *The Revenge of Geography*, turns his perceptive eye to a region that for centuries has been a meeting point of cultures, trade, and ideas. He undertakes a journey around the Adriatic Sea, through Italy, Slovenia, Croatia, Montenegro, Albania, and Greece, to reveal that far more is happening in the region than most news stories let on. Often overlooked, the Adriatic is in fact at the center of the most significant challenges of our time, including the rise of populist politics, the refugee crisis, and battles over the control of energy resources. And it is once

again becoming a global trading hub that will determine Europe ' s relationship with the rest of the world as China and Russia compete for dominance in its ports. Kaplan explores how the region has changed over his three decades of observing it as a journalist. He finds that to understand both the historical and contemporary Adriatic is to gain a window on the future of Europe as a whole, and he unearths a stark truth: The era of populism is an epiphenomenon—a symptom of the age of nationalism coming to an end. Instead, the continent is returning to alignments of the early modern era as distinctions between East and West

meet and break down within the Adriatic countries and ultimately throughout Europe. With a brilliant cross-pollination of history, literature, art, architecture, and current events, in *Adriatic*, Kaplan demonstrates that this unique region that exists at the intersection of civilizations holds revelatory truths for the future of global affairs.
