Within this 333-page guidebook, you will find the knowledge and practical steps upon implementation can help one achieve a natural state of abundance and experience conscious expansion. While other books focus on the "the secret" of the law of attraction, you will learn that there is far more available to you than material possessions and societal status. Inside these pages are revealed tools readily available to you that you may not even be aware of. This book is organized around the Mind, Body, and Spirit-the three spheres of being that need to operate in equilibrium for true knowledge of self, accelerated self betterment and the manifestation of desire. Written from a state of enlightenment reached only after deep meditation and facing life's many hardships, this guidebook presents full details of the metaphysical aspects of the mind and thoughts, the ego and self-identification, presence and creation, mindfulness, the anatomy of fear, chakra energy systems and healing, exercise and well-being, mineral-supplemented diets, along with the benefits of juicing, detoxing, clean eating, and living on a plant-based diet.

A new book by the author of *A is for Activist* is a rhyming, boldly illustrated vision of a better world. When you go to a march And raise your sign high You'll make people smile who thought you were shy And you'll make people wonder, does that kid really know why? You DO know of course That's why you are there You're there to say STOP! What's happening's not fair Then they say, we know what you're against End poverty stop war... But okay then what are you for? Oh! What are we for! That's my favorite question And I'm sure it's yours too Because you pay attention You have so many answers And so many options And so many solutions that you want to impart The only hard question is where does one start? Oh, *The Things We're For!* is a celebration of the better world that is not only possible, but is here today if we choose it. Today's kids are well aware of the many challenges that they face in a world they are inheriting, from climate change to police violence, crowded classrooms to healthcare. Poetically written and beautifully illustrated in Innosanto Nagara's (*A is for Activist*) signature style, this book offers a vision of where we could go--and a future worth fighting for. Oh, *the Things We're For!* is a book for kids, and for the young at heart of all ages.

Decade of Good

It has never been shown that human emissions of the gas of life drive global warming. Large bodies of science that don't fit the narrative have been ignored by IPCC, COP and self-interested scientists paid by taxpayers. A huge subsidised industry of intermittent unreliable wind and solar electricity has been created based on unsubstantiated science. The same hucksters now want subsidised hydrogen, costly inefficient EVs, subsidised mega-batteries and other horribly expensive tried and failed schemes to impoverish people, create unemployment, transfer wealth and enrich China. Germany, Texas, California and the UK had a glimpse of Net Zero with blackouts, astronomically high electricity costs and hundreds of deaths. We once had reliable cheap electricity and now that governments have gone green, we are heading for hard economic times. In this book I charge the greens with murder. They murder humans who are kept in eternal poverty without coal-fired electricity. They support slavery and early deaths of black child miners. They murder forests and their wildlife by clear felling for mining and wind turbines. They murder forests and wildlife with their bushfire policies. They murder economies producing unemployment, hopelessness, collapse of communities, disrupted social cohesion and suicide. They murder free speech and freedoms and their takeover of the education system has ended up in the murdering of the intellectual and economic future of young people. They terrify children into mental illness with their apocalyptic death cut lies and exaggerations. They try to divide a nation. They are hypocrites and such angry ignorant people should never touch other people's money. The greens are guilty of murder. The sentence is life with no parole in a cave in the bush enjoying the benefits of Net Zero.

"James Whiteside is an electrifying performer, an incredible athlete, and an artist, through and through. To know James is to love him; with Center Center, you are about to fall in love." —Jennifer Garner "A frank examination and celebration of queerness." —Good Morning America A daring, joyous, and inspiring memoir-in-essays from the American Ballet Theatre principal dancer-slash-drag queen-slash-pop star who's redefining what it means to be a man in ballet There's a mark on every stage around the world that signifies the center of its depth and width, called "center center." James Whiteside has dreamed of standing on that very mark as a principal dancer with the prestigious American Ballet Theatre ever since he was a twelve-year-old blown away by watching the company's spring gala. The GLAMOUR. The VIRTUOSITY. The RIPPED MEN IN TIGHTS! In this absurd and absurdist collection of essays, Whiteside tells us the story of how he got to be a primo ballerino—stopping along the way to muse about the tragically fated childhood pets who taught him how to feel, reminisce on ill-advised partying at summer dance camps, and imagine fantastical run-ins with Jesus on Grindr. Also in these pages are tales of the two alter egos he created to subvert the strict classical rigor of ballet: JbDubs, an out-and-proud pop musician, and Uhu Betch, an over-the-top drag queen named after Yoohee chocolate milk. Center Center is an exuberant behind-the-scenes tour of Whiteside's triple life, both on- and offstage—a raunchy, curious, and unapologetic celebration of queerness, self-expression, friendship, sex, creativity, and pushing boundaries that will entertain you, shock you", inspire you, embolden you . . . and maybe even make you cry. Offers fresh ways of approaching photography, showing how photographs circulate in an 'image world' that exists beyond their art and media origins. This book argues that these images permeate people's minds as much as the environment and that photography has affected our sense of time and its relationship to memory.
