Best friend, backwoods spitfire Maddie True, has her own woes a few miles away: widowed with a passel of young children, and caretaker to her addled father. Abandoned by her husband during the height of Wyoming Territory ' s worst drought in history, Eden depends on her inept brother, Aiden, to see her through the coming winter. But when he disappears into the wild Bighorn mountains, she shuns Maddie ' s fearful cautions, teaming with enigmatic Lakota holy man, Intah, to find her brother before the wicked snow holds them all hostage. " Light of the Northern Dancers is a powerful novel of a woman ' s journey, thought-provoking and unsettling in its authenticity and unflinching honesty. " — Susan Wiggs, NYT Bestselling Romance Author " Half of what happens to us may have reason, the rest is chaos. Robin F. Gainey ' s second novel, Light of the Northern Dancers, has this brand of existentialism. It ' real and it doesn ' t let go! " — Tom Skerritt, Award Winning Actor, Writer, Director

"A compelling, enjoyable, and widely accessible exploration of one of the most fundamental scientific issues of our age" (Brian Greene, author of The Elegant Universe). In The Hole in the Universe, an award-winning science writer "provides an illuminating slant on physics and mathematics by exploring the concept of nothing" (Scientific American). Welcome to the world of cutting-edge math, physics, and neuroscience, where the search for the ultimate vacuum, the point of nothingness, the ground zero of theory, has rendered the universe deep, rich, and juicy. Every time scientists and mathematicians think they have reached the ultimate void, something new appears: a black hole, an undulating string, an additional dimension of space or time, repulsive anti-gravity, universes that breed like bunnies. Cole's exploration at the edge of everything is "as playfully entertaining as it is informative" (San Jose Mercury News). "A strong and sometimes mind-blowing introduction to the edges of modern physics." -Salon.com "Comprising an expansive set of topics from the history of numbers to string theory, the big bang, even Zen, the book's chapters are broken into bite-sized portions that allow the author to revel in the puns and awkwardness that comes with trying to describe a concept that no one has fully grasped. It is an amorphous, flowing, mind-bending discussion, written in rich, graceful prose. As clear and accessible as Hawking's A Brief History of Time, this work deserves wide circulation, not just among science buffs." -Publishers Weekly, starred review "Here we have the definitive book about nothing, and who would think that nothing could be so interesting . . . not only accessible but compelling reading." -St. Louis Post-Dispatch

An Old Fashioned Recipe Book

In response to the explosion of the Fukushima Daiichi power plant in March 2011, this book examines how the concept of a risk society was handled in the various education programs implemented in post-disaster Fukushima. The explosion and subsequent radiation contamination that affected the biosphere of the Fukushima region and beyond, revealed that we live in a risk society. Despite this revelation, official discourses in Fukushima have been geared strictly toward the future, with the aim of restoring communities and resuming development projects. Based on the ethnographic data the author collected in Fukushima between 2013 and 2016, various contested emotions emerged in those education spaces as students and teachers remembered their romanticized and difficult past and dealt with the challenges presented by the risk society in their present lives. The emotionally-charged interactions between past and present also shaped their vision of their future community and of the actions they might take. The dialogues and actions that took places in these education spaces encourage readers to examine the meaning of development and question the basic assumptions and methods of education as society shifts to a risk society. A valuable resource for scholars and students in the fields of globalization and education, curriculum studies, sociology of education, and Japanese studies.
