

Larson Pport Texas Edition Book 2

What are the secrets of successful teams? Why do some teams achieve remarkable success while others fail or are consigned to mediocrity? To find the answers, Carl E. Larson and Frank M. J. LaFaso conducted a three-year study of teams and team achievement. Interviewing a wide range of teams, including the space shuttle Challenger investigation team, executive management teams and a championship football team, Larson and LaFaso discovered a surprising consistency in the characteristics of effective teams. In *Teamwork*, they explore the eight properties of successful teams: a clear, elevating goal; a results-driven structure; competent team members; unified commitment; collaborative climate; standards of excellence; external support and recognition; and principled leadership. A final chapter examines the priority of the steps that lead to the building of a high performance team. The authors strive to make the concepts concrete, coupling solid theory with straightforward, practical advice on how to apply it and with lively, fascinating anecdotes. The volume will appeal to practitioners, scholars, and advanced students in the areas of organization studies and management, as well as interpersonal communication.

Although Bill Nye (1850-1896) was America's best known humorist in the late 1880's and early 1890's, his work is little known today—his books long out of print and his columns yellowing in newspaper files. Now T. A. Larson, a dyed-in-the-wool Nye fan for more than thirty years, has assembled the best of Bill Nye's work, most of it dating from the seven Wyoming years when Nye made his name. The selections are chosen from Laramie, Cheyenne, and Denver newspapers and from six books published in the 1890's. The resulting collection is both good fun and a valuable picture of a lively period.

Northern bobwhites are one of the most popular game birds in the United States. In Texas alone, nearly 100,000 hunters take to the field each fall and winter to pursue wild bobwhite quail. Texas is arguably the last remaining state with sufficient habitat to provide quail-hunting opportunities on a grand scale, and Texas ranchers with good bobwhite habitat often generate a greater proportion of their income from fees paid by quail hunters than from livestock production. Managing and expanding bobwhite habitat makes good sense economically, and it benefits the environment as well. The rangelands and woodlands of Texas that produce quail also support scores of other species of wildlife. Texas Bobwhites is a field guide to the seeds commonly eaten by northern bobwhites, as well as a handbook for conserving and improving northern bobwhite habitat. It provides identifying characteristics for the seeds of 91 species of grasses, forbs, woody plants, and succulents. Each seed description includes a close-up and a scale photo of the seed and the plant that produces it, along with a range map. Using this information, hunters can readily identify concentrations of plants that are most likely to attract quail. Landowners and rangeland managers will greatly benefit from the book's state-of-the-art guidance for habitat management and restoration, including improving habitat dominated by invasive and nonnative grasses.

The Splendid and the Vile

Lone Star Daybreak

An Analytical Bibliography of Film Novelizations, Movie, and TV Tie-ins

What was Takako Konishi really doing in North Dakota, and why did she end up dead? Did she get lost and freeze to death, as the police concluded, while searching for the fictional treasure buried in a snowbank at the end of the Coen Brothers' film *Fargo*? Or was it something else that brought her there: unrequited love, ritual suicide, a meteor shower, a far-flung search for purpose? The seed of an obsession took root in struggling film student Jana Larson when she chanced upon a news bulletin about the case. Over the years and across continents, the material Jana gathered in her search for the real Takako outgrew multiple attempts at screenplays and became this remarkable, genre-bending essay that leans into the space between fact and fiction, life and death, author and subject, reality and delusion.

Odette Larson vividly recounts her adolescence on the edge of Las Vegas before it became the Disneyfied centre of family entertainment that it is today.

"The artist . . . will always be a special, isolated, solitary agent with an innate sense of organising matter." --Odilon Redon "Disturbing," "hallucinatory"--words that evoke pathology rather than history-- have long framed our understanding of Odilon Redon (1840-1916), a French artist admired by the Surrealists as a precursor in their exploration of the irrational. In this book, Barbara Larson takes a radically different view of Redon, one that does not attempt to deny him melancholia but does go a long way toward dismantling the paradigm that treats the cult of the irrational as the essential condition of his work. Larson instead contends that Redon should be seen as a gifted mediator of a context in which new scientific ideas mingled with the fears of social and racial decadence widespread in France after the debacle of the Franco-Prussian War. Larson begins by investigating Redon's early years in the Bordeaux region, where he met Armand Clavaud, a botanist who encouraged his interest in the mixture of botany, geology, zoology, and landscape studies then called Naturalism. Subsequent chapters integrate Redon's concentration upon black-and-white graphic media and his absorption of Darwin's teachings and new trends in physiology, psychology, and microbiology. All this enables Larson to offer insightful readings of Redon's predilection for bizarre, polymorphous forms. The *Dark Side of Nature* demonstrates that, at least insofar as Redon is concerned, late-nineteenth-century science meant not positivistic engagement with a stable material world, but rather the exploration of vast "invisible" realms, from microbes to electricity. With its clear exposition of scientific thought, Larson's book will undoubtedly make a significant contribution not only to Redon studies but also to the interdisciplinary study of art and science.

#1 NEW YORK TIMES BESTSELLER • The author of *The Devil in the White City* and *Dead Wake* delivers an intimate chronicle of Winston Churchill and London during the Blitz—an inspiring portrait of courage and leadership in a time of unprecedented crisis “One of [Erik Larson’s] best books yet . . . perfectly timed for the moment.”—*Time* • “A bravura performance by one of America’s greatest storytellers.”—NPR NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The New York Times Book Review* • *Time* • *Vogue* • NPR • *The Washington Post* • *Chicago Tribune* • *The Globe & Mail* • *Fortune* • *Bloomberg* • *New York Post* • *The New York Public Library* • *Kirkus Reviews* • *LibraryReads* • *PopMatters* On Winston Churchill’s first day as prime minister, Adolf Hitler invaded Holland and Belgium. Poland and Czechoslovakia had already fallen, and the Dunkirk evacuation was just two weeks away. For the next twelve months, Hitler would wage a relentless bombing campaign, killing 45,000 Britons. It was up to Churchill to hold his country together and persuade President Franklin Roosevelt that Britain was a worthy ally—and willing to fight to the end. In *The Splendid and the Vile*, Erik Larson shows, in cinematic detail, how Churchill taught the British people “the art of being fearless.” It is a story of political brinkmanship, but it’s also an intimate domestic drama, set against the backdrop of Churchill’s prime-ministerial country home, Chequers; his wartime retreat, Ditchley, where he and his entourage go when the moon is brightest and the bombing threat is highest; and of course 10 Downing Street in London. Drawing on diaries, original archival documents, and once-secret intelligence reports—some released only recently—Larson provides a new lens on London’s darkest year through the day-to-day experience of Churchill and his family: his wife, Clementine; their youngest daughter, Mary, who chafes against her parents’ wartime protectiveness; their son, Randolph, and his beautiful, unhappy wife, Pamela; Pamela’s illicit lover, a dashing American emissary; and the advisers in Churchill’s “Secret Circle,” to whom he turns in the hardest moments. *The Splendid and the Vile* takes readers out of today’s political dysfunction and back to a time of true leadership, when, in the face of unrelenting horror, Churchill’s eloquence, courage, and perseverance bound a country, and a family, together.

Part of the market-leading graphing approach series by Ron Larson, PRECALCULUS WITH LIMITS: A GRAPHING APPROACH is an ideal student and instructor resource for courses that require the use of a graphing calculator. The quality and quantity of the exercises, combined with interesting applications and innovative resources, make teaching easier and help students succeed. Retaining the series' emphasis on student support, selected examples throughout the text include notations directing students to previous sections to review concepts and skills needed to master the material at hand. The book also achieves accessibility through careful writing and design—including examples with detailed solutions that begin and end on the same page, which maximizes readability. Similarly, side-by-side solutions show algebraic, graphical, and numerical representations of the mathematics and support a variety of learning styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Developed to prepare students in the combined elementary and intermediate algebra course for a college-level curriculum, Elementary and Intermediate Algebra owes its success to the hallmark features for which the Larson team is known: learning by example, accessible writing style, emphasis on visualization, and comprehensive exercise sets. These pedagogical features are carefully coordinated to ensure that students are better able to make connections between mathematical concepts and understand the content. The new Student Support Edition continues the Larson tradition of guided learning by incorporating a comprehensive range of student success materials throughout the text. Additionally, instructors and students alike can track progress with HM Assess, a new online diagnostic assessment and remediation tool from Houghton Mifflin. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

It is often said that the Vietnam War taught us that the American public is no longer willing to tolerate American casualties in U.S. wars and military operations. There are also two contradictory corollaries: one that the first deaths in a conflict will spark demands for immediate withdrawal, the other that casualties lead to an inexorable demand for "escalation to victory." The truth is far more subtle and sensible. The simplest explanation consistent with the data is that public support for U.S. military operations and public tolerance for casualties are based upon a sensible weighing of benefits and costs that is influenced heavily by consensus (or its absence) among political leaders. When such agreement is missing, even low costs can erode public support for the intervention. In the end, most Americans do not want lives to be sacrificed for any but the most compelling and promising causes, and they rely on their leaders to illuminate just how compelling and promising these causes are.

This document supplies the technical appendices for a study that describes American public opinion toward the use of military force in support of the global war on terrorism (GWOT), delineates the sources of support and opposition, and identifies potential fault lines in support.

Part of the market-leading Graphing Approach series by Larson, Hostetler, and Edwards, Algebra and Trigonometry: A Graphing Approach, 5/e, is an ideal student and instructor resource for courses that require the use of a graphing calculator. The quality and quantity of the exercises, combined with interesting applications and innovative resources, make teaching easier and help students succeed. Continuing the series' emphasis on student support, the Fifth Edition introduces Prerequisite Skills Review. For selected examples throughout the text, the Prerequisite Skills Review directs students to previous sections in the text to review concepts and skills needed to master the material at hand. In addition, prerequisite skills review exercises in Edspace (see below for description) are referenced in every exercise set. The Larson team achieves accessibility through careful writing and design, including examples with detailed solutions that begin and end on the same page, which maximizes the readability of the text. Similarly, side-by-side solutions show algebraic, graphical, and numerical representations of the mathematics and support a variety of learning styles.

Texas announces it will leave the United States and form a new country. Families, friends, and professionals across the United States see old loyalties broken and new loyalties forged in the fires of personal ambition and necessity. Unknown, average young people find themselves on the tip of the spear of the upstart Texas Defense Force, formed to protect the new country. In a night that will forever change his destiny, going-nowhere sales clerk Michael Minze discovers he has a talent for killing, and bright but underachieving student Ann Militzer is offered a graduation present she can't refuse as a reward for her loyalty: the keys to a supersonic airplane. The leadership of the United States vows to stop Texas from seceding. And war ravages the nation.

Designed for first-year developmental math students who need support in intermediate algebra, the Fourth Edition of Intermediate Algebra owes its success to the hallmark features for which the Larson team is known: learning by example, accessible writing style, emphasis on visualization, and comprehensive exercise sets. These pedagogical features are carefully coordinated to ensure that students are better able to make connections between mathematical concepts and understand the content. The new Student Support Edition continues the Larson tradition of guided learning by incorporating a comprehensive range of student success materials throughout the text. Additionally, instructors and students alike can track progress with HM Assess, a new online diagnostic assessment and remediation tool from Houghton Mifflin. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Designed for first-year developmental students who need support in intermediate algebra, the Fourth Edition of Intermediate Algebra retains the hallmark features for which the Larson team is known: abundant, high-quality applications; the use of real data; the integration of visualization (figures and graphs) throughout; and extensive opportunities for self-assessment (mid-chapter quizzes, review exercises, tests, and cumulative tests). In developing supportive features for the Fourth Edition, the authors' goal is for students to come away from the class with a firm understanding of algebra and how it functions as a modern modeling language.

The American Controversy Over Creation and Evolution

Larson Intermediate Algebra Student Support Ed + Edspace

Dead Wake

Games and Play in the Theater of Spanish American Women With the same design and feature sets as the market leading Precalculus, 8/e, this addition to the Larson Precalculus series provides both students and instructors with sound, consistently structured explanations of the mathematical concepts. Designed for a two-term course, this text contains the features that have made Precalculus a complete solution for both students and instructors: interesting applications, cutting-edge design, and innovative technology combined with an abundance of carefully written exercises. In addition to a brief algebra review and the core precalculus topics, PRECALCULUS WITH LIMITS covers analytic geometry in three dimensions and introduces concepts covered in calculus. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Star Wars meets Harry Potter.™ - The Readings of an English Teacher IGIST follows the challenges and triumphs of Emi, a 14 year-old Earthing girl that dreams of getting into the renowned Intergalactic Institute of Science and Technology, or IGIST. The odds are stacked against her however. As humanity has spread across the galaxy they have grown to look down on the Bygones left on the brain-drained backwater of planet Earth and have no interest in stopping the plague that ravages the people left there. As Emi strives to become the first Earthing in 20 years to gain admittance to IGIST she meets an incredible cast of out-of-this-world characters: business tycoons from the asteroid belt, yak-men of the Warden Corps, snobby Martians, holographic deep-space Scouts, and of course her droid sidekick Sadee. Immerse yourself in the universe of IGIST, and find out if Emi has what it takes to save her home. IGIST: New Stars is the first book in the YA Science Fiction series that is growing into an international phenomenon. Beloved by readers and critics alike, this story not only thrills its audience with an incredible adventure, but inspires them to help build the future they want to see. "Truly a one-of-a-kind experience for science fiction fans and lovers of technology!" -Literature Approved Download the free IGIST app on iOS and Android to make the story an Immersive Novel: see the black-and-white illustrations in the book transform into colorful animations and discover hidden gems in Augmented Reality.

The literary tradition of New Orleans spans centuries and touches every genre; its living heritage winds through storied neighborhoods and is celebrated at numerous festivals across the city. For booklovers, a visit to the Big Easy isn't complete without whiling away the hours in an antiquarian bookstore in the French Quarter or stepping out on a literary walking tour. Perhaps only among the oak-lined avenues, Creole town houses, and famed hotels of New Orleans can the lust of A Stretcar Named Desire, the zainness of A Confederacy of Dunces, the chill of Interview with the Vampire, and the heartbreak of Walker Percy's Moviegoer begin to resonate. Susan Larson's revised and updated edition of *The Booklover's Guide to New Orleans* not only explores the legacy of Tennessee Williams and William Faulkner, but also visits the haunts of celebrated writers of today, including Anne Rice and James Lee Burke.

This definitive guide provides a key to the books, authors, festivals, stores, and famed addresses that make the Crescent City a literary destination.

The teaching of evolution in American high schools has been the subject of political and legal controversy. This new edition brings the history of the debate up to date.

A Saga of Churchill, Family, and Defiance During the Blitz

Encyclopedic in form, popular in style, Larson's New Book of Cults analyzes dozens of cults and movements from historical, sociological, and biblical perspectives. It will tell you what you want to know about the cults' origins, their appeal, and their strategies. Most important, it details how each cult deviates from Christian truth.

The clear approach and learning support you need to truly understand calculus with MULTIVARIABLE CALCULUS, 12th Edition by award-winning authors Larson and Edwards. This edition effectively presents and demonstrates the concepts and rules of calculus using a thoroughly updated and refined learning experience specifically designed to remove any typical barriers to learning. New Big Ideas of Calculus notes present the overarching ideas behind chapter topics to place the principles you're learning within a meaningful context. Annotated examples and Concept Checks further reinforce your understanding. A variety of exercises, including visually driven exercises, provide the resources you need to develop a deeper conceptual understanding of calculus. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

#1 NEW YORK TIMES BESTSELLER • From the bestselling author and master of narrative nonfiction comes the enthralling story of the sinking of the *Lustania* — Both terrifying and enthralling. “Thrilling, dramatic and powerful.” —NPR “Thoroughly engaging.” —George R.R. Martin On May 1, 1915, with WWI entering its tenth month, a luxury ocean liner as richly appointed as an English country house sailed out of New York, bound for Liverpool, carrying a record number of children and infants. The passengers were surprisingly at ease, even though Germany had declared the seas around Britain to be a war zone. For months, German U-boats had brought terror to the North Atlantic. But the *Lustania* was one of the era’s great transatlantic “Greyhounds” —the fastest liner then in service—and her captain, William Thomas Turner, placed tremendous faith in the gentlemanly strictures of warfare that for a century had kept civilian ships safe from attack. Germany, however, was determined to change the rules of the game, and Walter Schwieger’s U-boat, but told no one. As U-20 and the *Lustania* made their way toward Liverpool, an array of forces both grand and achingly small—hurib, a chance fog, a closely guarded secret, and more—all converged to produce one of the great disasters of history. It is a story that many of us think we know but don’t, and Erik Larson tells it brilliantly, switching between hunter and hunted while painting a larger portrait of America at the height of the Progressive Era. Full of glamour and suspense, *Dead Wake* brings to life a cast of evocative characters, from famed Boston bookseller Charles Lauriat to pioneering female architect Theodate Pope to presidential Woodrow Wilson, a man lost to grief, dreading the widening war but also captivated by the prospect of new love. Gripping and important, *Dead Wake* captures the sheer drama and emotional power of a disaster whose intimate details and true meaning have long been obscured by history. Finalist for the Washington State Book Award • One of the Best Books of the Year. *The Washington Post*, *St. Louis Post-Dispatch*, *Miami Herald*, *Library Journal*, *Kirkus Reviews*, *LibraryReads*, *Indigo*

In the seventeen dramatic texts examined in this study, women writers from Spanish America have self-consciously incorporated games into their plays' structures to highlight from a woman's perspective the idea that life, as well as the theatre, is a game. Some dramas are so overtly about games that the word appears significantly in their titles. Others reflect game playing in less direct ways or connect metaphorical examinations of role-playing to the ludic. In every drama examined, however, a game of some sort plays a key role in the construction of the playtext. By looking at the nature and number of the games played in these women-authored dramas from the past fifty years, we can see the ways in which play is used to effect social control and the connections between play and aggression, gender, history and politics. In these representative dramas, the theatre serves as a vehicle for encouraging audiences to think about (if not act upon) the issues that have shaped Spanish America. Games, rules, winners and losers join together as the playwrights explore events and times of fundamental importance in the countries' historical and political evolutions.

At the dawn of the twentieth century, a great confidence suffused America. Isaac Cline was one of the era's new men, a scientist who believed he knew all there was to know about the motion of clouds and the behavior of storms. The idea that a hurricane could damage the city of Galveston, Texas, where he was based, was to him preposterous, "an absurd delusion." It was 1900, a year when America felt bigger and stronger than ever before. Nothing in nature could hobble the gleaming city of Galveston, then a magical place that seemed destined to become the New York of the Gulf. That August, a strange, prolonged heat wave gripped the nation and killed scores of people in New York and Chicago. Odd things seemed to happen everywhere: A plague of crickets engulfed Waco. The Bering Glacier began to shrink. Rain fell on Galveston with greater intensity than anyone could remember. Far away, in Africa, immense thunderstorms blossomed over the city of Dakar, and great currents of wind converged. A wave of atmospheric turbulence slipped from the coast of western Africa. Most such waves faded quickly. This one did not. In Cuba, America's overconfidence was made all too obvious by the Weather Bureau's overreaction with controlling hurricane forecasts, even though Cuba's indigenous weathermen had pioneered hurricane science. As the bureau's forecasters assured the nation that all was calm in the Caribbean, Cuba's own weathermen fretted about ominous signs in the sky. A curious stillness gripped Antigua. Only a few unlucky sea captains discovered that the storm had achieved an intensity no man alive had ever experienced. In Galveston, reassured by Cline's belief that no hurricane could seriously damage the city, there was celebration. Children played in the rising water. Hundreds of people gathered at the beach to marvel at the fantastically tall waves and gorgeous pink sky, until the surf began ripping the city's beloved beachfront apart. Within the next few hours Galveston would endure a hurricane that to this day remains the nation's deadliest natural disaster. In Galveston alone at least 6,000 people, possibly as many as 10,000, would lose their lives, a number far greater than the combined death toll of the Johnstown Flood and 1906 San Francisco Earthquake. And Isaac Cline would experience his own unbearable loss. Meticulously researched and vividly written, *Isaac's Storm* is based on Cline's own letters, telegrams, and reports, and our latest understanding of the hows and whys of great storms. Ultimately, however, it is the story of what can happen when human arrogance meets nature's last great uncontrollable force. As such, *Isaac's Storm* carries a warning for our time.

Designed for first-year developmental math students who need support in beginning algebra, Elementary Algebra owes its success to the hallmark features for which the Larson team is known: learning by example, accessible writing style, emphasis on visualization, and comprehensive exercise sets. These pedagogical features are carefully coordinated to ensure that students are better able to make connections between mathematical concepts and understand the content. The new Student Support Edition continues the Larson tradition of guided learning by incorporating a comprehensive range of student success materials throughout the text. Additionally, instructors and students alike can track progress with HM Assess, a new online diagnostic assessment and remediation tool from Houghton Mifflin. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

LARSON'S ALGEBRA AND TRIG is ideal for a two-term course and is known for delivering sound, consistently structured explanations and carefully written exercises of mathematical concepts. Updated and refined through learning design principles, the 11th edition removes barriers to learning and offers a carefully planned and inclusive experience for all students. New Review & Refresh exercises prepare students for each section and provide a general skill review throughout the text. How Do You See It? exercises give students practice applying the concepts, and new Summarize features, and Checkpoint problems reinforce understanding of the skill sets to help students better prepare for tests. Larson's learning support includes free text-specific tutorial support at CalcView.com and CalcChat.com. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

PRECALCULUS: REAL MATHEMATICS. REAL PEOPLE, 7th Edition, is an ideal student and instructor resource for courses that require the use of a graphing calculator. The quality and quantity of the exercises, combined with interesting applications and innovative resources, make teaching easier and help students succeed. Retaining the series' emphasis on student support, selected examples throughout the text include notations directing students to previous sections to review concepts and skills needed to master the material at hand. The book also achieves accessibility through careful writing and design—including examples with detailed solutions that begin and end on the same page, which maximizes readability. Similarly, side-by-side solutions show algebraic, graphical, and numerical representations of the mathematics and support a variety of learning styles. Reflecting its subtitle, this significant revision focuses more than ever on showing students the relevance of mathematics in their lives and future careers. The Booklover's Guide to New Orleans

An account of the Chicago World's Fair of 1893 relates the stories of two men who shaped the history of the event—architect Daniel H. Burnham, who coordinated its construction, and serial killer Herman Mudgett.

Larson visits these and many other questions in full view of his colleagues, administrators, and students. He writes open letters to faculty and students in which he explores doubts about his own work as a teacher, his successes and failures in the classroom, his questions about the educational system, and his ideas on how to handle some of the more perplexing dilemmas today's teachers face. His colleagues and students reply with ideas and questions of their own. This book will lead teachers (pre-service and in-service), administrators, and education professors to reflect on their own systems, their own teaching methods, the ways they assess student work, and their hope and expectations for their students.

Larson's PRECALCULUS is known for delivering sound, consistently structured explanations and carefully written exercises of mathematical concepts. Updated and refined through learning design principles, the 11th Edition removes barriers to learning and offers a carefully planned and inclusive experience for all students. New Review & Refresh exercises prepare students for each section and provide a general skill review throughout the text. At 2.6 million, incarcerated Americans not only outnumber the nation's fourth-largest city, they make up a national constituency bound by a shared condition. *Fourth City*, Essays from the Prison in America presents more than seventy essays from twenty-seven states, written by incarcerated Americans chronicling their experience inside. In essays as moving as they are eloquent, the authors speak out against a national prison complex that fails so badly at the task of rehabilitation that 60% of the 650,000 Americans released each year return to prison. These essays document the authors' efforts at self-help, the institutional resistance such efforts meet at nearly every turn, and the impact, in money and lives, that this resistance has on the public. Directly confronting the images of prisons and prisoners manufactured by popular media, so-called reality TV, and for-profit local and national news sources, *Fourth City* recognizes American prisoners as our primary, frontline witnesses to the dysfunction of the largest prison system on earth. Filled with deeply personal stories of coping, survival, resistance, and transformation, *Fourth City* should be read by every American who believes that law should achieve order in the cause of justice rather than at its cost.

Coping With Loss describes the many ways in which people cope with the death of someone they love. Most earlier books on bereavement have fallen into two categories: distillations of the clinical experience of individual therapists or collections of chapters reporting the results of empirical studies. Each category is valuable but has tended to serve a narrow group of readers—practitioners with particular theoretical orientations or researchers in quest of the latest findings. Coauthored by a leading research psychologist and an experienced therapist who specializes in bereavement education and intervention, this book is different. The authors weave together the strands of theory, research, and clinical wisdom into a seamless and readable narrative. While they discuss previous work, they also present new data, never before published, from one of the largest studies of bereaved people ever conducted, the Bereavement Coping Project. Unlike most studies to date, which focused on only one type of bereaved group (usually widows or widowers), the Bereavement Coping Project examined the experiences of several different groups during the first 18 months after the death. The groups included those who had lost a spouse, a parent, an adult sibling, or a child, and those who had lost their significant other to cancer or cardiovascular disease on one hand or opposed to the stigmatized disease of AIDS on the other. The book begins with a critical overview of theories of bereavement, succeeding chapters explore in depth the impact of specific types of loss, the impact of particular coping strategies on recovery; the impact of social supports and religion, and the special cases of children and of people who seem to grow and change for the better after a loss. A final chapter considers implications for intervention with bereaved people. Each chapter is richly illuminated with real-life examples throughout and ends with a section called "Voices" in which bereaved people describe their various attempts to cope in their own words. Insightful and informative.
