Here is a strategy that some students have found helpful in the past: Read each chapter before that class. Bring the textbook to class and follow along in the textbook making notes in the margin or separate sheets of paper when I say something that isn't in the textbook. Remember, the textbook is my lecture notes.

1.1 The importance and rise of project management. Projects are becoming increasingly important. One of the reasons is because innovation is driven by projects and innovation is becoming increasingly important. Our economy has shifted from where competition between firms focussed on operational excellence (becoming more efficient) to one where competition is driven by disruptive innovation.
