Ever since humans became self-aware, we have struggled to find the meaning of life. The price we paid for becoming intelligent was to become painfully ignorant of the difference between good and evil. Adi, a 10-year-old boy, works together with two old philosophers as they try to unravel the prophecy of a promised King. With insatiable curiosity, Adi must work with the wise men as they rationalize with each other on why and how humans became intelligent. Together they attempt to answer

some of the most profound questions related to existence. Does evolution end with human beings or is there an 'Overman' who can reach evolution's pinnacle? Will this Overman be able to define values for humankind? Centuries later a young boy promises his mother that he will always uphold the love that she has taught him. It is a promise that drowns him in the nectar of the gods. Krish grows up to be an engineer and joins a team of scientists as they try to create artificial consciousness in a machine. Krish soon realizes that he has a bigger fight on his hands. A fight to preserve love in a desolate world. His quest for true love ultimately leads him down a path where he comes face to face with

a fearsome snake delivering a kiss of death. Humans have come a long way by questioning the nature of objects around us and pushing the limits of our intelligence, but it's now time that we ask the greatest question yet: when does intelligence transcend to become consciousness?

An anthology of writings on atheism, agnosticism, and skepticism by some of the world's most celebrated thinkers.

After witnessing their hard-fought world peace returning to chaos, three dragon siblings must reunite to save their kind from extinction while battling against ancient sorcerers, men and other dragons before war consumes

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles

and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as

contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

When one thinks of the Mille Miglia, the most celebrated

Page 6/51

race in the world that took place between 1927 and 1957, the mind certainly goes back to OM, Bugatti, Mercedes-Benz, Porsche, Lancia as well, of course, as the ultra-victorious Alfa Romeo and Ferrari, the greatest car manufacturers that have competed in the Italian marathon. But the memorable history of the great race is made up mainly of men: drivers, co-drivers, mechanics, technical and sports directors, organisers as well as film and show business personalities plus, naturally, an immense public following. All of those faces have names, some well-known others less so, and stories, some well worth telling others less so. The book brings together a series of

portraits in alphabetical order that make up the fragments of this historic sports and cultural mosaic that was the Mille Miglia, once again told by Leonardo Acerbi from his deep knowledge of the Brescia-based race.

series! In Ree's own words: “ I was all grown up when I moved out to the country. When I first arrived, I felt so out of place! But eventually, I looked around and discovered all the wonderful things about country life. So I decided to write a story about my experiences, as seen through the eyes of a little girl named Ree. Little Ree moves to the country and feels as scared and unsure as I was. But then she finds that if she sets her mind to it, being a country girl is a pretty cool thing. Come along on her adventures! ” Little Ree trades in her city days for a country way of life when she moves with her family to her grandparents ’ ranch. She ’ s excited to ride horses, swim in the pond, and help Grandma cook for everyone. But on her first day, she

finds that living on a ranch can be tough. She has to get up at the crack of dawn, learn to herd cows, and make sure her horse, Pepper, doesn't eat everything in sight. And that's all before breakfast! Will she ever get used to this new place? Luckily, the end of the day brings a big family barbecue...and the happy discovery that being a country girl isn't about the right pair of boots, it's all about the right attitude. With warmth, humor, and stories inspired by life on the ranch, Ree Drummond's new picture book introduces us to a spunky new picture book star and treats us to a special pancake recipe at the end!

For more than 120 years (1714 – 1837) Great Britain was linked to the German Electorate, later Kingdom, of

Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian

connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

Verino Lunari, ventottenne disoccupato, in seguito a una serie di violenti attacchi di panico comincia a assumere quotidianamente una compressa di Cipralex, un antidepressivo che come sorta di effetto collaterale gli provoca ogni notte sogni vividissimi. Verino decide di registrare i suoi sogni in un diario, e in seguito di stendere un resoconto dove riportare quelli per lui più significativi. Qui è come se ci offrisse di entrare nella sua stanza segreta delle follie. Dentro ci si trova di tutto. Oggetti che respirano. Fantasmi dell'aldilà che perseguitano persone all'indirizzo sbagliato. Demoni "posseduti" da esseri umani. E molto, molto altro

ancora. Presto, però, ci accorgiamo che Verino racconta di sogni dove protagonisti sono sempre i suoi amici e immancabilmente lei: Veronica, la sua ex-fidanzata... In un crescendo di sovrapposizioni tra realtà, sogno, immaginazione e allucinazione, in questa storia d'amore e tradimenti la sola certezza è che niente fino all'ultimo è quel che sembra.

Opening with a powerful and tender 'Ode

to the Hymen', Sharon Olds uses this

age-old poetic form to address many

aspects of herself, in a collection

that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination

that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her - the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here - Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader. Grandview High's french class is heading out on a school trip to Paris. The three weeks in Paris are supposed to be an 'educational opportunity' for this lot. But of course, these hormonal teenagers just cannot abide by the rules. The one rule set by their lovely Mr. Walker: You cannot room with somebody of the opposite gender. So what does this french class do? Room with the opposite gender, with a funny way of picking roommates. Chit picking.

Because hormonal teenagers can just never get enough. Insert Asher West. Her not so secret annoying hater. It's a hate-hate relationship. He's the guy who picked Riley's name. He's the most popular guy in the freaking school and Riley? Not so much. Put the two together and you'll get a whole lot of arguments and awkward moments. They're roommates and they're stuck in Paris, the city of love and the city of lights
