Linear and Quasi-linear Evolution Equations in Hilbert Spaces
Graduate Studies in Mathematics Volume 135. Linear and Quasi-linear Evolution Equations ... In the quasi-linear case, equations (0.0.2) will in general have only local solutions; that is, even if the source term f is defined on a given interval

Linear and Quasi-linear Evolution Equations in Hilbert Spaces
Buy Linear and Quasi-linear Evolution Equations in Hilbert Spaces (Graduate Studies in Mathematics, Vol. 135) by Pascal Cherrier, Albert Milani (ISBN: 9780821875766) from Amazon's Book Store. Everyday low prices and free delivery on eligible orders.

Linear and Quasi-linear Evolution Equations in Hilbert ...
of linear equations are constructed explicitly, using the Galerkin method; the linear theory is then applied to quasi-linear equations, by means of a linearization and fixed-point technique. The authors also compare hyperbolic and parabolic problems, both in terms of singular perturbations, on compact

Linear and Quasi-linear Evolution Equations in Hilbert Spaces
In these lectures I shall discuss the Cauchy problem for linear and quasi-linear equations of evolution of the form
$$\begin{aligned} (L) \quad & du + A(t)u = 0, \quad 0 \leq t \leq T, \quad u(0) = \phi, \\ (Q) \quad & du + A(u(t))u = 0, \quad 0 \leq t \leq T, \quad u(0) = \phi, \end{aligned}$$
 where $du = dtu = du/dt$. In the case of (Q), we shall consider only local solutions in time ...

Linear and Quasi-Linear Equations of Evolution of ...
In these lectures I shall discuss the Cauchy problem for linear and quasi-linear equations of evolution of the form
$$(L) \quad du + A(t)u = 0, \quad 0 \leq t \leq T, \quad u(0) = \phi$$

$\phi, \text{cr} \& (Q) \quad du + A(u(t))u = 0, \quad 0 \leq t \leq T, \quad u(0) = \phi, \text{cr}$ where $du = dt u = du/dt$.

Linear and Quasi-Linear Equations of Evolution of ...

Solutions of linear equations are constructed explicitly, using the Galerkin method; the linear theory is then applied to quasi-linear equations, by means of a linearization and fixed-point technique.

Linear and Quasi Linear Evolution Equations in Hilbert ...

Linear and Quasi-linear Evolution Equations in Hilbert Spaces
Quasi-linear Equations of Evolution where the unknown u takes values in a Banach space, and $A(t, u)$ is a linear, possibly unbounded, operator depending on t and u . We shall start from four real Banach spaces $Y \subset X \subset V \subset Z$, (7.2.2) with

Linear And Quasi Linear Evolution Equations In Hilbert ...

Abstract In these lectures I shall discuss the Cauchy problem for linear and quasi-linear equations of evolution of the form
$$\{ \& (L) \quad du + A(t)u = 0, \quad 0 \leq t \leq \dots$$

A linear first-order p.d.e. on two variables x, y is an equation of type

$a(x,y)u_x + b(x,y)u_y = c(x,y)u(x,y)$. We will be able to solve equations of this form; in fact of a slightly more general form, so called quasi-linear: $a(x,y,u)u_x + b(x,y,u)u_y = c(x,y,u)$.
Solution.

1 Quasi-Linear Partial Differential Equations

The present volume is self-contained and introduces to the treatment of linear and nonlinear (quasi-linear) abstract evolution equations by methods from the theory of strongly continuous semigroups. The theoretical part is accessible to graduate students with basic knowledge in functional analysis. Only some examples require more specialized knowledge from the spectral theory of linear, self-adjoint operators in Hilbert spaces.
