

Logistics Audit Checklist

Audit Planning: Internal auditors should have a plan in place well before the actual auditing begins. Examining and Evaluating Information: Internal auditors should have a standardized criterion to compare findings against.

Communicating Results: Audit should have a clear and concise method of reporting their findings.

Logistics Audit A logistics audit removes process bottlenecks by means of restructurings. Service levels and the quality of logistics will be increased, and logistics areas can be used optimally. A logistics audit is, therefore, the first step to sustainably improve the location. low medium high
