(PLTC) have sponsored The Professional Educational Long-Term Care Training Manual, and now its second iteration, Geropsychology and Long Term Care: A Practitioner ' s Guide. Education of psychologists working in long-term care settings is consistent with PLTC ' s mission to assure the provision of high-quality psychological services for a neglected sector of the population, i.e., residents in nursing homes and assisted-living communities. To this end, direct training of generalist psychologists in the nuances of psychological care delivery in long-term care settings has been a major priority. It is a tribute to the accelerating nature of research in long-term care settings that a revision is now necessary. After all, the Professional Educational

Training Manual ' s initial publication date was only in 2001. However, in the intervening years, much progress has been made in addressing assessment and intervention strategies tailored to the needs of this frail but quite diverse population. It is so gratifying to be able to say that there is now a corpus of scientific knowledge to guide long-term care service delivery in long-term care settings.

Develop the skills you need to effectively and efficiently document patient care for children and adults in clinical and hospital settings. This handy guide uses sample notes, writing exercises, and EMR activities to make each concept crystal clear, including how to document history and physical exams and write SOAP notes and prescriptions.
