Lowcountry Hurricanes: Three Centuries of Storms at Sea ...

At once sobering and thrilling, this illustrated history recounts how, for the past three hundred years, hurricanes have altered lives and landscapes along the Georgia-South Carolina seaboard. A prime target for the fierce storms that develop in the Atlantic, the region is especially vulnerable because of its shallow, gradually sloping sea floor and low-lying coastline.

Lowcountry Hurricanes: Three Centuries of Storms at Sea and Ashore (review) Walter J. Fraser, Jr. University of Georgia Press, Athens, GA, . pp., photographs, appendix. \$. cloth (ISBN) dennis b. blanton Fernbank Museum of Natural History, Atlanta We live in a time when good books about hurricanes may be more useful than ever.

Lowcountry Hurricanes: Three Centuries of Storms at Sea ...

Fraser gives extended treatment to nine major storms that caused the most damage in the antebellum period (in 1804, 1824, and 1854), the late nineteenth century (in 1881, 1893, and 1898), and the twentieth century (1911, 1989 [Hugo], and 1999 [Floyd]).

Lowcountry Hurricanes: Three Centuries of Storms at Sea ...

In the 1720s, hurricanes hit the South Carolina coastline at least three times, but we have very limited information about some of these storms. During that decade, South Carolina was in the process of making a very slow and rather painful political transition from being a Proprietary colony, owned by a small group of Lords Proprietors, to a Royal colony, owned directly by the British monarchy.

Hurricanes in Lowcountry History, Part 1 | Charleston ...

In the three decades after the hurricane of 1822, the South Carolina Lowcountry witnessed the arrival of a number of tropical storms and mild hurricanes. The hurricanes of 1824, 1834, 1835, 1837, and 1846 were the most notable of this era, but they were not very memorable, and so we have very little detailed information about them.

Centuries of storms: Hurricanes leave a mark on South ...

In considering all of the above, it would thus appear that global warming over the past three centuries has had no discernible impact on the overall number and/or return rates of hurricanes in the Charleston area, but may have reduced the number of major hurricanes. Such observations fail to support climate alarmist predictions.
