

Make Drones Teach An Arduino To Fly

Lets build an Arduino based flight controller that can do wireless PID tuning, Orientation lock and altitude hold and position lock with the help of A GPS Ok So this DIY flight controller is an educational Arduino based module. It's simple to make, easy to program and is a great project for experienced hobbyist like me.

Make Drones Teach an Arduino to Fly

The name of the book "Make: Drones: Teach an Arduino to Fly" implies to me that it would instruct me to "teach" or code an Arduino board to fly as part of a drone. Instead this book is all about hardware with very few examples of coding. Maybe break apart the MultiWii program into digestible pieces and explain how each piece works. Only then ...
