"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset.Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

When Rolf Dahlgren and I embarked on preparing this book series, Rolf took prime responsibility for monocotyledons, which had interested him for a long time. After finishing his comparative study and family classification of the monocots, he devoted much energy to the acquisition and editing of family treatments for the present series. After his untimely death, Peter Goldblatt, who had worked with him, continued to handle further incoming monocot manuscripts until, in the early 1990s, his other obligations no longer allowed him to continue. At that time, some 30 manuscripts in various states of perfection had accumulated, which seemed to form a solid basis for a speedy completion of the FGVP monocots; with the exception of the grasses and orchids which would appear in separate volumes. I felt a strong obligation to do everything to help in publishing the manuscripts that had been put into our hands. I finally decided to take charge of them personally, although during my life as a botainst I had never seriously been interested in monocots.

Originally published in 1985, this concordance lists all the words in the text indexed, along with the locations of their appearance in the Field of Reference. The Verbal Index lists the location of the context of each word in the Field of Reference. There is also a table listing alphabetically all words employed in the text and giving their frequency of occurrence. This volume is part of a series which produced verbal indexes, concordances, and related data for all of Conrad ' s works.

Examines the American newspaper industry from the 1830s to 1930 and discusses how innovators of the press, such as Bennett, Greeley, Pulitzer, and Hearst, created a bond between newspapers and the American citizenry.

This handbook offers a systematic exploration of current key topics in travel writing studies. It addresses the history, impact, and unique discursive variety of British travel writing by covering some of the most celebrated and canonical authors of the genre as well as lesser known ones in more than thirty close-reading chapters. Combining theoretically informed, astute literary criticism of single texts with the analysis of the circumstances of their production and reception, these chapters offer excellent possibilities for understanding the complexity and cultural relevance of British travel writing.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it ' s practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

The Music of Malaysia, first published in Malay in 1997 and followed by an English edition in 2004 is still the only history, appreciation and analysis of Malaysian music in its many and varied forms available in English. The book categorizes the types of music genres found in Malaysian society and provides an overview of the development of music in that country. Analyses of the music are illustrated with many examples transcribed from original field recordings. Genres discussed include theatrical and dance forms, percussion ensembles, vocal and instrumental music and classical music. It is an excellent introduction to and exploration of the country's vibrant musical culture. This new, fully revised and updated edition includes time lines, listening guides and downloadable resources of field recordings that are analysed and discussed in the text.

The culmination of more than fifty years of research by the foremost living expert on plant classification, Diversity and Classification of Flowering Plants is an important contribution to the field of plant taxonomy. In the last decade, the system of classifying plants has been thoroughly revised. Instead of describing every individual family, Takhtajan includes descriptions in keys to families, which he calls "descriptive keys." The advantage of descriptive keys is that they give both the characteristic features of the families and their differences. The delimitation of families and orders drastically differs from the one accepted by the Englerian school and from the one accepted in Arthur Cronquist's system. Takhtajan favors the smaller, more natural families and orders, which are more coherent and better-defined, where characters are easily grasped, and which are more suitable for information retrieval and phylogenetic studies, including cladistic analysis (because it reduces polymorphic codings).
