Accounting, 15 entries in the bibliography,
language: English, abstract: Every
accounting student of the past sixty years
has learned about inventory costing- a
bookkeeping procedure that
manufacturing accountants follow to
separate the production expense of an
accounting period from the cost of

Page 72/97

management-and-cost-accounting-n-drury-8th-edition-pdf

manufactured product inventories at the end of the period. (Johnson and Kaplan, 1991, p. 130) This technique of valuing inventory should, although often practiced, not be used for managerial decision making though. It oversimplifies the consumption of overhead costs by products, services and customers and

Page 73/97

therefore leads to distorted cost information. Activity-based costing (ABC), developed by single manufacturing firms in the early 1980s, seems to provide more reliable information. The second part of this work describes the concept of ABC by summarizing the arguments of two pioneers in this field. In their book

Page 74/97

management-and-cost-accounting-n-drury-8th-edition-pdf

"Relevance Lost: The Rise and Fall of Management Accounting," first published in 1987, H. Thomas Johnson and Robert S. Kaplan (1991) examine the traditions of management accounting and describe possible improvements. In part three the developments of ABC in the last 20 years are described by reviewing a choice of

Page 75/97

management-and-cost-accounting-n-drury-8th-edition-pdf

important literature. Part four then shows the impact that ABC had on implementing companies. The conclusion, part five, contains an assessment of the used literature and an evaluation of whether the critic of traditional management accounting has been overcome by ABC. The eBooks is authored by proficient
