

## Manual Transmission Stuck First Gear

I have a 5 speed manual transmission in a 1997 Ford f150 that is stuck in first gear and will not shift into any other gear including neutral. What is the problem and how do I fix it? Report; Follow; Asked by Kester57 Jun 21, 2014 at 07:26 PM about the 1997 Ford F-150 STD SB

Pontiac manual transmission stuck in first gear? Answer. Wiki User November 20, 2014 4:57AM. You should check the shift linkage on your Pontiac. You may also want to check your linkage cable ...

If your car with an automatic transmission is stuck in a certain gear and refuses to shift up or down, there are two common causes. The first is that a solenoid in your transmission, which is the way that your car's computer mechanically engages gear changes, has become stuck.

Mine was butter....well, until now. I have TRD ORSB 4x4 and have 872 miles. Just now, and just today I was driving in downtown and it got stuck in 3rd gear and i couldnt get it out. Today was the first day i drive the truck more than 25 mikes in a single trip. I was in the city then jumped on the highway then popped back into the city.

### Manual Transmission Stuck First Gear

Manual transmission stuck first gear Pressed clutch in, put car into neutral when starting, let off clutch. all fine for about 1 min then it made sound, jumped forward like i had put the clutch in and put it into gear, let off clutch but didnt push gas pedal.

### SOLVED: Manual transmission stuck first gear - Fixya

Manual Transmission Won't Go into Gear When Running: The Symptoms Any repair or replacement of the transmission components are inconvenient, time-consuming, and requires a handsome amount of money. So, you should be on alert for unusual activities to detect a glitch at the primary stage. The car will make a grinding sound during this problem.

### The Reasons for Manual Transmission Won't Go into Gear ...

If these small teeth were to become damaged or worn out, it would be difficult to shift the transmission. And when a gear is shifted, the function of the bigger teeth is to engage the spinning counter gear which sends a transmission to the output shaft. If the big teeth are damaged or worn out, the transmission will make noise.

### 6 Causes of a Manual Transmission Being Hard to Shift ...

A manual transmission can slip out of gear for several reasons: - Insufficient oil --- sometimes contaminated oil. However, mechanical issues may be common as well, for example: - gearshift lever problems, like a worn nylon insert or lever attachment nut loose. - gearshift mechanism, shift forks, shift rail, springs, detent plugs worn or damaged.
