The feeder terminal REF 542plus is a compact protection, control, measurement and supervision terminal for the power distribution system. The same terminal can be used

for feeder, transformer and motor protection and control, or solely for switchgear control.

ABB Library - All Categories

The feeder terminal REF 542plus, like its predecessor REF 542, combines measurement, monitoring, protection, control and self diagnostics in one package. With its integrated communication protocols, the REF 542plus can be easily incorporated into any substation automation system from ABB or third parties.
