Readers of Spirou already know the Marsupilami - that lovable creature with the nature-defying tail. Here, in his own series, we follow the Marsupilami's life in his natural habitat. And his adventures are as funny as ever!

To uphold family honor and tradition, Sheetal Prasad is forced to forsake the man she loves and marry playboy millionaire Rakesh Dhanraj while the citizens of Raigun, India, watch in envy. On her wedding night, however, Sheetal quickly learns that the stranger she married is as cold as the marble floors of the Dhanraj mansion.

Forced to smile at family members and cameras and pretend there's nothing wrong with her marriage, Sheetal begins to discover that the family she married into harbors secrets, lies and deceptions powerful enough to tear apart her world. With no one to rely on and no escape, Sheetal must ally with her husband in an attempt to protect her infant son from the tyranny of his family.sion.

Detective Inspector Peter Grant is back in an all-new comic miniseries from author Ben Aaronovitch! Trouble never lies far from the race track. When a flash car belonging to a young boy racer from England washes up in the Netherlands with a bagload of unusual cargo, it's evident there is more than meets the eye happening at street races held in an Essex car park. Enter Detective Inspector Peter Grant. Fresh from suspension, he takes to the track in his orange 'asbo' Ford Focus to try and infiltrate the big leagues. But Peter soon finds himself sucked back into an Otherworld - a real-life fairyland!

Every week we pile our garbage on the curb and it disappears—like magic! The reality is anything but, of course. Trashed, Derf Backderf 's follow-up to the critically acclaimed, award-winning international bestseller My Friend Dahmer, is an ode to the crap job of all crap jobs—garbage collector. Anyone who has ever been trapped in a soul-sucking gig will relate to this tale. Trashed follows the raucous escapades of three 20-something friends as they clean the streets of pile after pile of stinking garbage, while battling annoying small-town bureaucrats, bizarre townfolk, sweltering summer heat, and frigid winter storms. Trashed is fiction, but is inspired by Derf 's own experiences as a garbageman. Interspersed are nonfiction pages that detail what our garbage is and where it goes. The answers will stun you. Hop on the garbage truck named Betty and ride along with Derf on a journey into the vast, secret world of garbage. Trashed is a hilarious, stomach-churning tale that will leave you laughing and wincing in disbelief.

Marsupilami - Volume 6 - Fordlandia

John Leguizamo's smash-hit one-man shows have been acclaimed by critics and fans alike. In this new Harper Paperback edition, all four shows are compiled into one phenomenally entertaining volume. Mambo Mouth (1991), Leguizamo's first show, was an off Broadway sensation. Leguizamo's portrayal of seven different Latino characters earned him both Obie and Outer Critics Circle awards. His follow up, Spic-O-Rama (1993), a "dysfunctional family comedy," presents 24-hours in the life of one family. It enjoyed a sold-out run in Chicago before relocating to New York where it won its creator a Drama Desk Award. Freak (1998), Leguizamo's Broadway debut, is his own coming-of-age story. A "demi-semi-quasi-pseudo-autobiography," the show was a critical and commercial success and won an Emmy when it was shown on TV. Sexaholix: A Love Story (2001), based on the sold-out national tour of John Leguizamo Live! was nominated for an Outer Critics Circle Award as well as a Tony Award. Alternately hilarious and poignant, always candid and searingly intelligent, The Works of John Leguizamo is a must-have for fans of this inimitable performer.

The great French Marxist philosopher weighs up the contributions of the three major critics of modernity With the translation of Lefebvre's philosophical writings, his stature in the English-speaking world continues to grow. Though certainly within the Marxist tradition, he consistently saw Marx as an 'unavoidable, necessary, but insufficient starting point'. Unsurprisingly, Lefebvre always insisted on the importance of Hegel to understanding Marx. But the imposing Metaphilosophy also suggested the significance he ascribed to Nietzsche, in the 'realm of shadows' through which philosophy seeks to think the world. Lefebvre proposes here that the modern world is at the same time Hegelian in terms of the state; Marxist in terms of the social and society; and Nietzschean in terms of civilization and its values. As early as 1939, Lefebvre pioneered a French reading of Nietzsche that rejected the philosopher's appropriation by fascism, bringing out the tragic implications of Nietzsche's proclamation that 'God is dead' long before this approach was followed by such later writers as Foucault, Derrida and Deleuze. Forty years later, in the last of his philosophical writings, Lefebvre juxtaposes the contributions of the three great thinkers, in a text whose themes remain surprisingly relevant today.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Kaja doesn't like change in her life. And why should she? Everything seems to be quite nice and settled: she is living in a cosy flat in the centre of Zurich, together with her faithful dog Zorro. She has a successful career as a computer programmer and a casual relationship with a charming work colleague. Surely, it couldn't get any better. - But then her whole life comes crashing down: her lover turns out to be a cheat, her professional reputation is in tatters and to cap it all, she starts seeing a shiny blue creature called Lance who does his very best to get on her nerves. Has it all been too much for her recently? Is she hallucinating? Or is she the only girl in the world with a personal dragon at her service? Virginia Fox's debut novel tells the story of a young woman, her journey from just living to finding a purpose in life, all told in a light-hearted, humorous style. You will laugh and cry with her and you will be genuinely happy for her in the end. - Only it won't be the end. It will be the beginning of new adventures, because this is only part one of the author's trilogy. A book for dragon friends and animal lovers, looking for a little bit of magic in their life.

Nature has always been a source of inspiration for the design of the human environment. The analysis of biological constructions can not only lead to astonishing technical solutions but can also inspire the design of architecture. Bionics is a fascinating border area between pure research and practical application: biologists, chemists, physicists, mineralogists, and paleontologists meet up with material scientists, engineers, and architects and transfer their knowledge to architecture and construction. Using numerous practical examples, this richly illustrated introduction traces the process from the understanding of how something functions, to abstraction-for example in computer models-and the construction of initial prototypes, through to fully functional manufacture and production.

Riding peacefully along a western trail, lucky Luke is suddenly ambushed by an unknown assailant. After a quick gunfight, the cowboy loses his mysterious attacker, but happens upon a lone wagon beset by Apache raiders. Another quick fight later, Luke is surprised to find that the occupants of the wagon are three lovely young women! Three sisters on their way to start a new life, and who all find the lonesome cowboy ... quite interesting.

FUNGIRL is a hapless (hopeless) hot mess of a woman crashing through life, leaving chaos in her wake. Although her oblivious antics infuriate her roommate, terrify the teenage skaters she tries to impress, and threaten her every opportunity for employment, FUNGIRL remains charming, transgressive, and hilarious. Pich's cartoonish art is simple and quirky, with clean lines and bold colors. The art transforms potentially graphic scenes of sex and violence into adorably cute, almost sweet, vignettes. Pich renders FUNGIRL's particular messiness deliciously palatable, like an inappropriate wedding cake.

Some time in the 1940s, Narcisse, a young French sailor is abandoned on the coast of Australia and given up for dead by his shipmates. Seventeen years later he is found living among aboriginal peoples, having apparently forgotten everything of his original identity, including his native French language. Octave de Vallombrun, a well-meaning geographer, takes him under his wing and sets out to bring Narcisse, now known as the "white savage" back to civilisation and to find out what happened during those seventeen years.Observing Narcisse's struggle to adjust to the ways of the white man, Octave too begins to question his assumptions about what it means to be civilised, and to see in a new light the man known as the "white savage".

The Rejection of Consequentialism

Contemporary Theatre, Film and Television

A Valuable Guide to Better Golf

Data Structures Through C

The Life of Charlie Chaplin

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Charlie Chaplin made an amazing seventy-one films by the time he was only thirty-three years old. He was known not only as the world's first international movie star, but as a comedian, a film director, and a man ripe with scandal, accused of plagiarism, communism, pacifism, liberalism, and anti-Americanism. He seduced young women, marrying four different times, each time to a woman younger than the last. In this animated biography of Chaplin, Joyce Milton reveals to us a life riddled with gossip and a struggle to rise from an impoverished London childhood to the life of a successful American film star. Milton shows us how the creation of his famous character—the Tramp, the Little Fellow—was both rewarding and then devastating as he became obsolete with the changes of time. Tramp is a perceptive, clever, and captivating biography of a talented and complicated man whose life was filled with scandal, politics, and art.

Snoopy and Charlie Brown, Calvin and Hobbes, Tintin and Snowy? comics are home to many memorable child and animal figures. Many cultural productions, especially children's literature and cartoons, stress the similarities between children and animals, similarities that have their limits and often place the child, as human, above the animal. Still, these fictional situations offer opportunities for thinking of child-animal relationships in diverse ways through, for instance, considering the possibilities of privileged contact between children and animals or of animals that are more knowledgeable and powerful than children and even adults.0Despite the prevalence and success of child-animal tandems in comics and culture, we know very little about these relationships. What makes them so popular? How do they work? How much do they vary across time and cultures? What do they tell us about the place of animals and children in comics and in the real world?0Strong Bonds: Child-animal Relationships in Comics' takes a first, important step in this direction. Bringing together scholars with a diverse range of comics expertise, the volume's chapters combine contextualized readings of comics with relevant theories for interrogating childhood and animalhood, their overlaps and divergences. The strong bonds between children and animals mapped out here point towards alternative modes of conceptualizing family and identity and, ultimately, alternative means of reading, interpreting and imagining.0With chapters on early comics (the Italian children's magazine 'Corriere dei Piccoli' during WWI, Harold Gray's 'Little Orphan Annie') international and regional classics ('Tintin', the Flemish 'Jonkeke') and contemporary graphic novels (Bryan Talbot's 'A Tale of One Bad Rat', Brecht Even's 'Panther'), this critical anthology sheds light on a vast array of child-animal relationships in comics from Europe and North America.00.
