The 35th anniversary edition of the classic how-to book that has helped millions of artists learn to draw. When it was originally published in 1970, *How to Draw What You See* zoomed to the top of Watson-Guptill's best-seller list—and it has remained there ever since. “I believe that you must be able to draw things as you see them—realistically,” wrote Rudy de Reyna in his introduction. Today, generations of artists have learned to draw what they see, to truly capture the

world around them, using de Reyna ' s methods. How to Draw What You See shows artists how to recognize the basic shape of an object—cube, cylinder, cone, or sphere—and use that shape to draw the object, no matter how much detail it contains.

Get a feel for your art—literally! 101 Textures in Colored Pencil teaches you every technique you ' ll need to give your colored-pencil drawings realistic, palpable texture. *Named One of the 54 Best Colored Pencil Drawing Books of All Time by BookAuthority* There has never been a better opportunity to master textures. Knowing how to

make your surfaces and textures look real is one of the most challenging aspects of creating art in colored pencil, even for experienced artists. 101 Textures in Colored Pencil provides artists with step-by-step instructions for drawing a wide variety of the most common textures and surfaces, including sand, water, metals, foliage, wood, fabrics, stone, grass, hair, and many more. To get you started, this comprehensive guide opens with a review of tools and materials as well as basic skills, such as strokes, effects, and color mixing. Each page of instruction is a comprehensive resource on how to create a specific texture,

complete with two to three easy-to-follow steps and a final, detailed image of the finished artwork. Plus, the book is organized into sections based on subject matter, so you can easily find the specific texture you're looking for. An artist's gallery in the back of the book provides examples of the textures in completed works of art. Just a sample of the textures you will learn to render: People: smooth skin; aged skin; straight, curly, and wavy hair; lips
Animals & Insects: smooth, curly, and course canine fur; elephant skin; feather; fish scales
Fabrics & Textiles: burlap, tweed, silk, velvet, leather, lace, sequins
Glass, Stone, Ceramics, Wood

& Metal: porcelain, polished silver, hammered brass, peeling paint Food & Beverage: red wine, cut citrus fruit, coconut, peach, dark chocolate Nature: smooth and rough bark, moss, river pebbles, still and rippled lake, clouds 101 Textures in Colored Pencil includes all the textures you need to create realistic masterpieces in colored pencil. Unlike many other art books only give recipes for mixing colors or describe step-by-step painting techniques, *Color and Light* answers the questions that realist painters continually ask, such as: "What happens with sky colors at sunset?", "How do colors change with distance?", and "What

makes a form look three-dimensional?" Author James Gurney draws on his experience as a plain-air painter and science illustrator to share a wealth of information about the realist painter's most fundamental tools: color and light. He bridges the gap between abstract theory and practical knowledge for traditional and digital artists of all levels of experience.

When the exhibition that sparked the publication of this book opened in the artist's home-town of Montpellier towards the end of 2010, it was hailed as the "rebirth of a 19th Century master" and the rediscovery of a great painter. Amazingly, this volume is the first comprehensive retrospective of the life and works of the artist. Sir Charles Eastlake, a former president of the British Royal Academy and director of the National Gallery,

was one of the world's foremost experts on the techniques of painting. A painter of considerable renown himself, he devoted years to traveling throughout England and Europe, where he searched through museums, monasteries, universities, and libraries, gradually amassing a collection of rare manuscripts from which he was able to reconstruct the technical secrets of the great painters of the past. In this comprehensive treasury (two volumes

bound as one), Eastlake presents the results of his researches. He offers detailed discussions of Greek and Roman art methods, medieval techniques, tempera painting, the revolutionary use of oil paints by Hubert van Eyck, Flemish methods of preparing colors, and the methods of Reynolds and other 18th-century British masters. The second volume focuses on the technical secrets of members of various Italian schools, including such masters as

Leonardo, Raphael, Perugino, Correggio, Andrea del Sarto, and many others. Rounding off the book are more than 100 pages of professional essays covering a wide range of subjects—from "Life in Inanimate Things" and "Neutral Tints in White and Other Draperies" to "Venetian Process" and "How to Compose and Paint a Single Head." Students, painters, art historians, and any lover of fine art will find Eastlake's work invaluable, both for its source material and its

painstaking coverage of the technical evolution of painting. Dover (2001) unabridged republication in one volume of the work originally published by Longman, Brown, Green, and Longmans in two volumes in 1847 as *Materials for a History of Oil Painting*.

Introduction: Drawing with colored pencil is super easy if you use the
right colors and have drawn a good sketch. Unlike the graphite pencils,
colored pencils cannot be easily erased, so we have to draw carefully,
particularly the darker areas. Always draw parts with colored pencil
pressing down lightly and if it looks good, color over the same area
pressing down hard. Buy good brand of colored pencils and smooth
paper. If you don't have a lot of say red pencils, you can get more
nuances with only one pencil, by controlling how hard you press when
you draw. In the image below I've drawn with one red pencil three

nuances. In the first example I pressed hard, in the second I pressed normally and in the third example I pressed lightly. Even more nuances can be created this way:

In the last years of his life Paul Cézanne produced a stunning series

of watercolors, many of them still lifes. Still Life with Blue Pot is one of these late masterpieces that is now in the collection of the Getty Museum. In *Cézanne in the Study: Still Life in Watercolors*, Carol Armstrong places this great painting within the context of Cézanne's artistic and psychological development and of the history of the genre of still life in France. Still life—like the medium of watercolor—was traditionally considered to be “low” in the hierarchy of French academic paintings. Cézanne chose to ignore this hierarchy, creating monumental still-life watercolors that contained echoes of grand landscapes and even historical paintings in the manner of Poussin—the “highest” of classical art forms. In so doing he changed his still lifes with new meanings, both in terms of his own notoriously difficult personality and in the way he used the genre to explore the very process of looking at, and creating, art.

Carol Armstrong's study is a fascinating exploration of the brilliant watercolor paintings that brought Cézanne's career to a complex, and triumphant, conclusion. The book includes new photographic studies of the Getty's painting that allow the reader to encounter this great watercolor as never before, in all of its richness and detail. Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at

the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific

analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Easy-to-follow demonstrations show you how to use colored pencils to paint trees, flowers, animals, people and other popular subjects. The colored pencil is an easy-to-

use, inexpensive and incredibly expressive medium. And nobody is more skilled with the pencil than Bet Borgeson. Using many visual examples to illustrate her points, Bet will teach you how to use layering, burnishing, lifting color and other basic colored pencil techniques to create an exciting range of effects—from highly detailed realism to loose, luscious color. She also offers advice on choosing the right materials, conveying textures, layering in backgrounds, and combining colored pencil with other mediums.

Want to paint more like Manet and less like Jackson Pollock? Students of art hailed Classical Drawing Atelier, Juliette Aristides's first book, as a dynamic return to the atelier educational model. Ateliers, popular in the nineteenth century, teach emerging artists by pairing them with a master artist over a period of years. The educational process begins as students copy masterworks, then gradually progress to painting as their skills develop. The many artists at every level who learned from Classical Drawing Atelier have been clamoring for more of this sophisticated approach to teaching and learning. In Classical Painting Atelier, Aristides, a leader in the atelier movement, takes students step-by-step through the finest

works of Old Masters and today's most respected realist artists to reveal the principles of creating full-color realist still lifes, portraits, and figure paintings. Rich in tradition, yet practical for today's artists, Classical Painting Atelier is ideal for serious art students seeking a timeless visual education. Discusses the fundamental materials and equipment of watercolor painting and describes techniques for painting portraits, character studies, and landscapes in watercolors. Learning to render a variety of textures is a fundamental skill for any fine artist, no matter the chosen media or subject matter. The Complete Book of Textures for Artists features more than 275 step-by-step lessons, tips, and techniques for rendering a wide range of textures in a variety of media,

including graphite pencil, charcoal, colored pencil, oil, and acrylic. Whether you're an experienced artist or just starting out, *The Complete Book of Textures for Artists* features a wide variety of both traditional and contemporary techniques. After an introduction to the basic tools and materials, discover a variety of drawing and painting techniques, such as hatching, crosshatching, shading, blending, layering, burnishing, and more.
