Carved by a sculptor of exceptional talent, this exquisite portrait bust depicts an elegant Roman woman of wealth and distinction. The subject bears a solemn expression as she looks to her left, which affords a tantalizing glimpse of her intricate hairstyle.

Roman portraiture was one of the most significant periods in the development of portrait art. Originating from ancient Rome, it continued for almost five centuries. Roman

portraiture is characterised by unusual realism and the desire to convey images of nature in the high quality style often seen in ancient Roman art. Some busts even seem to show clinical signs. Several images and statues made in marble and bronze have survived in small numbers. Roman funerary art includes many portraits such as

Roman Portraits: Uses and Re-Uses Private portrait sculpture was most closely associated with funerary contexts. Funerary altars (38.27) and tomb structures were adorned with portrait reliefs of the deceased along with short inscriptions noting their family or patrons,...

In ancient Rome, official portraits were an extremely
important way for emperors to reach out to their subjects,
and their public image was defined by them. As hundreds of
surviving imperial statues show, there were only three ways
in which the emperor could officially be represented: in the

battle dress of a general; in a toga, the Roman state civilian costume; or nude, likened to a god.
