Resources for Math 381

Unlike many modeling courses that use a textbook that focuses on one kind of mathematical model, this course will cover a broad spectrum of modeling problems, from optimization to dynamical systems to stochastic processes. Part of the course will use the textbooks by Mark Meerschaert and Richard Haberman. Both have titles of Mathematical models.

Mathematical Modeling (MATH 462)

Mathematical Modeling

Mathematical Modeling Meerschaert Solutions

Mathematical modeling is the link between mathematics and the rest of the world. Meerschaert shows how to refine a question, phrasing it in precise mathematical terms. Then he encourages students to reverse the process, translating the mathematical solution back into a comprehensible, useful answer to the original question.
