Integrated egg production is the most advanced enterprise and involves full mechanization and automation of the egg production cycle including battery egg laying, temperature controls, scientific feeding and mechanized egg collection methods.

Chapter 1 - Egg production

Producers in this study used both family labor, including husband and wife, children, nieces, and nephews, and hired labor. On six of the farms, husbands and wives both work on pastured poultry production. Table 1 below shows that, on the farms raising 4,000 to 10,000 chickens, families provide most of the labor.
