choosing wire gauge, the distance the wire must run and the amperage it will be expected to carry must be determined ...

Metric Awg Wire Size Equivalents

In America, the commonest system is the AWG numbering scheme, where the numbers are applied not only to individual strands but also to equivalent size bunches of smaller strands. For example 24AWG could be made of 1 strands of 24AWG wire (1 / 24) or 7 strands of 32 AWG wire (7 / 32). See also:

Diameters in inches and mm

and also the cross sectional area.

FAQ: AWG chart and the metric system | Eland Cables
AWG - American Wire Gauge - is an U.S. standard for wire conductor size. The "gauge" is related to the diameter of the wire. larger "gauge" - > smaller diameter and thinner wire; The AWG standard includes copper, aluminum and other wire materials. Typical household copper wiring is AWG number 12 or 14. Telephone wire is usually 22, 24, or 26.
