U.S.-Mexico border, however, is no easy task. From the Pacific Ocean to the Gulf of Mexico, from small rural agricultural and ranching communities to large urban centers of innovation and advanced manufacturing, the border is based in both tradition and the crossing of boundaries. It is both Mexico and the United States; yet it is something more.

With a population of about 126 million in 2019, Mexico ranks as the 10th most populated country in the world. It is the most populous Spanish-speaking country and the third-most populous in the Americas after the United States and Brazil. Throughout most of the twentieth century Mexico's population was characterized by rapid growth. Although this tendency has been reversed and average annual population growth over the last five years was less than 1%, the demographic transition is still in progr
