

Mey Ferguson User Guide

" Daughter of Laharna " provides a glimpse of family life in Laharna Hotel, Larne, which was Patricia ' s home for 24 years, and also details its history from 1833 - becoming the largest tour hotel in Ireland. Her father George A. Beattie was Resident Manager of Laharna Hotel, Larne from 1935 and in the Second World War, as part of essential services, looked after troop feeding at Larne Harbour and later the American Officer ' s Club in the former Midland Hotel, Belfast. These were formerly railway owned hotels. Laharna Hotel was the base for a 6 day tour of N Ireland and with some 200 tourist residents weekly, from April to October, shows the great extent of tourism in the Province before " The Troubles " began in 1968, lasting some 30 years. The hotel, destroyed by fire in 1999, was then demolished. This is a personal history of the Beattie family ' s life in the hotel, how George, born in Belfast, became an hotelier, his lifelong hobby of music as a piano accompanist and church organist. It records many events such as the Titanic launch, WW2 events in NI, the tragic sinking of the Princess Victoria in 1953 and family life in Larne. Introduction to Nursing Research: Incorporating Evidence-Based Practice, Fifth Edition teaches nursing students how to integrate evidence-based practice and research into their daily practice while considering the newest trends and research.

Arsenic in drinking water derived from groundwater is arguably the biggest environmental chemical human health risk known at the present time, with well over 100,000,000 people around the world being exposed. Monitoring the hazard, assessing exposure and health risks and implementing effective remediation are therefore key tasks for organisations and individuals with responsibilities related to the supply of safe, clean drinking water. Best Practice Guide on the Control of Arsenic in Drinking Water, covering aspects of hazard distribution, exposure, health impacts, biomonitoring and remediation, including social and economic issues, is therefore a very timely contribution to disseminating useful knowledge in this area. The volume contains 10 short reviews of key aspects of this issue, supplemented by a further 14 case studies, each of which focusses on a particular area or technological or other practice, and written by leading experts in the field. Detailed selective reference lists provide pointers to more detailed guidance on relevant practice. The volume includes coverage of (i) arsenic hazard in groundwater and exposure routes to humans, including case studies in USA, SE Asia and UK; (ii) health impacts arising from exposure to arsenic in drinking water and biomonitoring approaches; (iii) developments in the nature of regulation of arsenic in drinking water; (iv) sampling and monitoring of arsenic, including novel methodologies; (v) approaches to remediation, particularly in the context of water safety planning, and including case studies from the USA, Italy, Poland and Bangladesh; and (vi) socio-economic aspects of remediation, including non-market valuation methods and local community engagement.

Climate change and an evolving non-renewable energy sector threaten the future viability and sustainability of communities across the country. While rural communities have a special place in the national fabric, they often lack the resources to tackle these important and evolving threats. Planning for Rural Resilience: Coping with Climate Change and Energy Futures makes clear that communities and municipalities have opportunities to make informed and constructive decisions in the face of uncertainty; many of these decisions are "win-win" in the sense that they benefit the community in the short term while also building resilience for the future. Case studies include a town rebuilding itself after a tornado and an individual farmer's commitment to creating a resilient farm. They provide examples of innovative, successful, and practical on-the-ground actions and strategies. Planning for Rural Resilience asks central questions about the nature of change and the ability to adapt in rural regions. While change is often feared, communities have capacity that can be rallied, harnessed, and turned towards planning policy and action that responds to threats to the future. This important work will assist municipal decision makers, planners, and community members as well as anyone who has a passion for the future and betterment of rural life.

Is America the new world empire? Presidents from Woodrow Wilson to George W Bush may have denied it but, as Niall Ferguson's brilliant and provocative book shows, the US is in many ways the greatest imperial power of all time. What's more, it always has been an empire, expanding westwards throughout the nineteenth century and rising to global dominance in the twentieth. But is today's American colossus really equipped to play Atlas, bearing the weight of the world on its shoulders? The United States, Ferguson reveals, is an empire running on empty, weakened by chronic deficits of money, manpower and political will. When the New Rome falls, he warns, its collapse may well come from within.

This publication includes the Proceedings of the PLE Conference 2013. The Conference on Personal Learning Environments is now an established annual international, scientific event and a reference point for the current state of the art in research and development in Personal Learning Environments (PLE). The PLE Conference creates a space for researchers and practitioners to share concepts, case studies and research related to the design, development and implementation of Personal Learning Environments in diverse educational contexts including formal and informal education. The 4th PLE Conference in 2013 took place at B euth University of Applied Sciences in Berlin, Germany together with a parallel event at Monash University in Melbourne, Australia. The PLE Conference 2013 received 75 submissions and welcomed almost 100 delegates from Europe, Asia, Australasia, North and South America and Africa.The papers included in the Proceedings provide rich and valuable theoretical and empirical insights into Personal Learning Environments. Personal Learning Environments (PLE) is an approach in Technology-Enhanced Learning (TEL) based on the principles of learner autonomy, ownership and empowerment. PLEs are integrated, individual environments for learning which include specific technologies, methods, tools, contents, communities and services constituting complex learning infrastructures, enhancing new educational practices and at the same time emerging from these new practices. This represents a shift away from the traditional model of technology-enhanced learning based on knowledge transfer towards a model based on knowledge construction and sharing.

Field Guide to the Trees of the Gila Region of New Mexico is the definitive guide for field botanists, researchers, students, and avid nature lovers who wish to explore the natural history of native and introduced tree species across the Gila. The book documents over seventy-five tree species in the first wilderness area in the United States—and the largest in New Mexico—known for its wildness, remoteness, and significant recreation opportunities. Drawing on extensive fieldwork, the authors feature detailed individual species accounts and special ecological and ethnobotanical information, providing full dichotomous keys to the families, genera, and species of all trees in the region. Color photographs of the species provide diagnostic clarity for easy identification, showing the whole tree, trunk, and foliage as well as macro photos of the flowers, fruits, or cones and other significant features. This comprehensive and user-friendly guide will be welcomed by residents and visitors studying and discovering the diverse trees of the Gila Region.

Airman's Guide

A completely satirical yet oddly practical guide to surviving and thriving in Canada ' s westernmost province. So you ' ve arrived in British Columbia. Perhaps you ' re just passing through; perhaps you want to stay a while. You may even be contemplating making British Columbia your home. What you need is a well-researched, clearly written, and comprehensive guide to living and even prospering in Canada ' s westernmost province. This isn ' t it. However, the information contained in this book will allow you to experience British Columbia with minimal damage to your health and well being. Having lived in nearly every province in the country before settling in BC, Ian Ferguson can say with great authority that things work differently here. So differently, in fact, that visitors and newcomers from other parts of Canada may put themselves in physical (or social) peril if they try to dress, act, drive, work, vote, or socialize in the same ways as they would in Ontario, New Brunswick, or (god forbid) Alberta. With practical advice, little-known facts, and personal anecdotes, Ferguson tackles everything from how to recognize a local (and differentiate the various types of) facial hair that delineate the male British Columbian) to how to survive both natural and unnatural disasters (whether it ' s a light dusting of snow on the southern tip of Vancouver Island or a full-blown hockey riot) to how BC has been governed through the ages (like the time a bootlegger was put in charge of prohibition). Illuminating, hilarious, and only mildly offensive (if you have no sense of humour), The Survival Guide to British Columbia will make you question why you ever came here in the first place.

This field guide aims at giving comprehensive information about the key species endangered, vulnerable or critically endangered in Lebanese and Jordanian protected areas of the MEET project.

Virtual private networks (VPNs) based on the Internet instead of the traditional leased lines offer organizations of all sizes the promise of a low-cost, secure electronic network. However, using the Internet to carry sensitive information can present serious privacy and security problems. By explaining how VPNs actually work, networking expert Jon Snader shows software engineers and network administrators how to use tunneling, authentication, and encryption to create safe, effective VPNs for any environment. Using an example-driven approach, VPNs Illustrated explores how tunnels and VPNs function by observing their behavior "on the wire." By learning to read and interpret various network traces, such as those produced by tcpdump, readers will be able to better understand and troubleshoot VPN and network behavior. Specific topics covered include: Block and stream symmetric ciphers, such as AES and RC4; and asymmetric ciphers, such as RSA and ElGamal Message authentication codes, including HMACs Tunneling technologies based on tunnel SSL protocol for building network-to-network VPNs SSH protocols as drop-in replacements for telnet, ftp, and the BSD r-commands Lightweight VPNs, including VTun, CIPE, tinc, and OpenVPN IPsec, including its Authentication Header (AH) protocol, Encapsulating Security Payload (ESP), and IKE (the key management protocol) Packed with details, the text can be used as a handbook describing the functions of the protocols and the message formats that they use. Source code is available for download, and an appendix covers publicly available software that can be used to build tunnels and analyze traffic flow. VPNs Illustrated gives you the knowledge of tunneling and VPN technology you need to understand existing VPN implementations and successfully create your own.

A DIY Guide to Building, Repairing and Maintaining Exce

Renowned for his An Essay on the History of Civil Society (1767), Ferguson offers writings that are distinguished by a moral and historical bent, framed within a teleological outlook that upholds the importance of action and virtue for the emerging society of the 18th century.

The fear of abandonment typically results in a person unintentionally engaging in behaviors that push other people away, thus leading to their worst fear..... that of being abandoned. Then being abandoned causes the person to fear it even more in the future. There enlites the problem of this type of fear being a self-perpetuating downward spiral that can only get worse and worse - unless..... You decide to do something about it. Of course it 's recommended to work with a therapist to resolve and diminish your fears, but that 's not all you can do. Through a little effort, you may be able to work through these issues on your own. This book is meant to help serve you as a self-help guide to working through the fear of abandonment, so that you may finally be able to build flourishing and healthy relationships without panicking about what may or may not happen in the future. Let's get started!

Places the idea of jury duty into perspective, noting its importance as a constitutional responsibility, and describes ways in which the experience may be enriched.

The process of ethnographically detailing how individuals encounter institutions is a complicated task. Few are those accounts that manage to clearly elucidate how new institutional knowledge passes through individuals within the course of normative, everyday living. Elizabeth Challinor's ethnography of rural Santiago, Cape Verde does an outstanding job of revealing how the introduction of new institutional procedures are felt and experienced in non-suspecting places, in non-suspecting ways and with non- suspecting outcomes. Challinor's descriptions of the encounter between new policies and daily practice provide an important lesson on the power in ethnographically informed theorization.

AVIATION SAFETY: A BALANCED INDUSTRY APPROACH, first edition provides an innovative approach to the presentation of contemporary aviation safety detailing a number of pertinent subject matter areas. This book is designed to enhance the pedagogy of aviation safety by presenting topics and information that are derived from and directly applicable to various aspects of the aviation industry. Featuring issues on contemporary aviation safety, flight safety programs, regulatory organizations, ground operations safety, gap analysis, ethics, and safety management systems, the book provides a theoretical background to safety issues, all while making a significant connection to how the information can be directly applied to the aviation industry. Learning and Diversity in the Cities of the Future

The instant New York Times bestseller. A brilliant recasting of the turning points in world history, including the one we're living through, as a collision between old power hierarchies and new social networks. " Captivating and compelling. " —The New York Times "Niall Ferguson has again written a brilliant book...In 400 pages you will have restocked your mind. Do it."—The Wall Street Journal " The Square and the Tower, in addition to being provocative history, may prove to be a bellwether work of the Internet Age. " —Christian Science Monitor Most history is hierarchical: it's about emperors, presidents, prime ministers and field marshals. It's about states, armies and corporations. It's about orders from on high. Even history "from below" is often about trade unions and workers' parties. But what if that's simply because hierarchical institutions create the archives that historians rely on? What if we are missing the informal, less well documented social networks that are the true sources of power and drivers of change? The 21st century has been hailed as the Age of Networks. However, in The Square and the Tower, Niall Ferguson argues that networks have always been with us, from the structure of the brain to the food chain, from the family tree to freemasonry. Throughout history, hierarchies housed in high towers have claimed to rule, but often real power has resided in the networks in the town square below. For it is networks that tend to innovate. And it is through networks that revolutionary ideas can contagiously spread. Just because conspiracy theorists like to fantasize about such networks doesn't mean they are not real. From the cults of ancient Rome to the dynasties of the Renaissance, from the founding fathers to Facebook, The Square and the Tower tells the story of the rise, fall and rise of networks, and shows how network theory—concepts such as clustering, degrees of separation, weak ties, contagions and phase transitions—can transform our understanding of both the past and the present. Just as The Ascent of Money put Wall Street into historical perspective, so The Square and the Tower does the same for Silicon Valley. And it offers a bold prediction about which hierarchies will withstand this latest wave of network disruption—and which will be toppled.

Right-wing militias and other antigovernment organizations have received heightened public attention since the Oklahoma City bombing. While such groups are often portrayed as marginal extremists, the values they espouse have influenced mainstream politics and culture far more than most Americans realize. This important volume offers an in-depth look at the historical roots and current landscape of right-wing populism in the United States. Illuminated is the potent combination of anti-elitist rhetoric, conspiracy theories, and ethnic scapegoating that has fueled many political movements from the colonial period to the present day. The book examines the Jacksonians, the Ku Klux Klan, and a host of Cold War nationalist cliques, and relates them to the evolution of contemporary electoral campaigns of Patrick Buchanan, the militancy of the Posse Comitatus and the Christian Identity movement, and an array of millennial sects. Combining vivid description and incisive analysis, Berlet and Lyons show how large numbers of disaffected Americans have embraced right-wing populism in a misguided attempt to challenge power relationships in U.S. society. Highlighted are the dangers these groups pose for the future of our political system and the hope of progressive social change. Winner—Outstanding Book Award, Gustavus Myers Center for the Study of Bigotry and Human Rights in North America

Are you or is someone you care about considering a committed relationship. This manual covers the best of relationships as well as possible conflicts or fights. Most marital fights are about the wrong subjects. That is why they feel so frustrating and hopeless. Such battles cannot offer relief. Arguments about nothing, or arguing when the partners are not on the same subject, only function to avoid the real questions. The real questions may be scary, or our training since childhood may not prepare us to ask them. As you read through this manual and explore the questions under "Can we talk here?" at the end of each chapter, you will discover new ways to approach these important questions. First of all, consider whether some of the questions below touch on major issues that you are not discussing, but should be. As you read these questions, how do you feel? Can you picture asking your partner these questions? Also consider these same questions in terms of how you view your partner. Are you happy? How do you feel about me? Am I your best friend? Am I safe with you? Do you want the best for me? Do you choose me above all others, including your family, friends, colleagues, and so on? Do I still turn you on? When do you most enjoy time with me? Do you respect my intelligence? Do you believe that I respect you? Do you love me? Do you envision being with me for the rest of our lives? This manual offers quick overviews of many concepts, goals, and problems in committed relationships. I hope that by the time you have worked through these chapters, you will have built greater trust and will be able to ask such challenging questions with confidence. In addition to brief descriptions of common marital issues, you will find some basic questions to consider and discuss and targeted references for each of these issues. The goal is to get some quick ideas and at least begin your healing. When couples are struggling or facing painful situations, they often cannot wait through entire books or wait for counseling appointments to get some relief. --- Don Ferguson has created a hands-on guide for couples who want more out of their relationship. Filled with keen insight, sage advice and subtle humor, The Couples Manual draws on the author's extensive experience with helping couples work together to create the relationship they want, but that eludes them due to the myriad challenges all couples face. If you're ready to dig in and help your relationship thrive, The Couples' Manual is a fabulous resource. -Henry Emmons, MD- author of The Chemistry of Joy and The Chemistry of Calm

Introduction to Nursing Research

Field Guide to the Trees of the Gila Region of New Mexico

This volume reviews the experimental data on drug-radiation interactions. Special emphasis is placed on clinically-useful antitumor drugs. Particular reference is made to appropriate timing, concentration and sequencing of drug-radiation combinations. It includes discussions on the relative merits of experimental data derived from animal versus human tumors. This book also presents a section on the potential for new model systems or alternative test procedures for evaluating therapeutic benefits and cytotoxicities. Results of randomized clinical studies are reviewed with emphasis on recent studies involving protocols specifically designed to test the benefits from optimal integration of chemotherapy with radiotherapy. This book is intended for laboratory researchers in the field and clinicians interested in using the combined modality approach. It is also a useful resource for radiologists, oncologists, and all those interested in cancer research.
