Policing, crime, poverty, prison management - these are just some of the key issues facing society today. This book addresses such issues, raising questions that should be of interest not only to academic criminologists but also to all those involved in the criminal justice system.

This fifth edition of *International Law: A South African Perspective* is now titled *Dugard's International Law: A South African Perspective*, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. *Dugard's International Law: A South African Perspective* presents a South African perspective of international law. The basic principles of international law are described and examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial decisions and legislation on international law receive equal treatment with international law as it is practised and taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of

international law both at home in South Africa and abroad.

This work adopts a multidisciplinary approach to corporate communication, including management communication, public relations, organizational behavior and change, marketing communication, and advertising. The many-faceted approach adopts the perspective of a practicing communications professional, emphasizes corporate branding, and focuses on an integrated approach to communication.

The present book is about Hausa linguacultural practices. Its primary goal is to demonstrate aspects of the relationship between Hausa language and culture as it affects northern Nigeria, the territory with the largest concentration of native-Hausa speakers on earth today. Using various examples, illustrations and real-life situations, the book seeks to portray Hausa speakers' experiences and practices as they daily exploit their language to communicate their needs and, in

the process, express their culture. These experiences and practices are realised largely through Hausa verbal and non-verbal means or both which together give rise to linguacultural patterns of behaviour unique to the speakers. It is hoped that readers, particularly non-Hausas, will find the book enjoyable especially in trying to experience what native-Hausa speakers, using their language to communicate, experience during social interactions. Supported by a number of optional activities and exercises, students and teachers of Hausa will particularly find the book not only resourceful and entertaining but also reader-friendly especially with regard to the role of culture in language learning and teaching. Indeed the book has been partly written to encourage the use of Hausa culture in language teaching and learning.

This fully updated second edition of Teaching English, Language and Literacy is an essential introduction for anyone learning to teach English at primary school level. Adult development - a life span that could easily be four to five times longer than that of childhood - is an important discipline in its own right. As life expectancy is increasing more rapidly than at any other time in human history, scientific knowledge about adult development and especially ageing will become even more crucial. Some younger students may wonder whether learning about adult development is relevant for them. It definitely is. First, adult development is about the 'future you'. It is about the remarkable journey most of you have already entered and the fascinating life journey that lies ahead

of you. Second, the information in the book should help you to understand all other adults better, including those close to you such as your parents, grandparents, and other older family members. Therefore, we believe that you will not only enjoy studying this book, but also find it enriching. • The target audience of this book is primarily undergraduate students in psychology, education, social work, psychiatry, and related disciplines. However, the nature and extent of Adult Development and Ageing also makes the text suitable for use at postgraduate level (especially where this field was not a focus area in the undergraduate course). Furthermore, the book contains valuable information that will be useful to anyone who has an interest in adult development. • There is a special focus to ageing as an integral part of human development. This special focus on ageing is also the main reason for including it in the title of this book. • The book focuses on the unique South African situation, therefore, local research data and South African examples are included in the book where possible.

RAMPA HAS DECLARED . . . "Man is one tenth conscious, the other nine tenths deal with the subconscious and all that which comes under the heading." **"THIS BOOK IS ABOUT YOU! NOT JUST ABOUT ONE TENTH OF YOU, BUT ALSO THAT WHICH GOES BEYOND THE TENTH"** For many years the famous author and occult master has been asked thousands of questions from both students and admirers from all over the world. They all want to know how they can better their own lives and how they can bring about a global spiritual revolution which would include all of humankind, not just one political group or religious sect. Every half million years (give or take) the earth sees fit to shuck off its stock, as it goes about preparing the surface of the planet for the next bunch, whom it hopes might be more successful in living in harmony with nature and the cosmic plan. If you are traumatized by the insanities of our times T. Lobsang Rampa may provide you with some ways to calm your nerves and confront the devils that seek to stifle our every movement and prevent us from becoming the individual we were meant to be. **BEYOND THE TENTH** is a rally cry for what is transpiring all around us. Come and join the "party" and free yourself from the shackles of self-imposed human slavery.

In this scholarly and timely presentation of the history of economic thought, you'll see how new ideas, evidence, problems and values can be used to reconsider basic disputes

and major contributions of the past. **THE EVOLUTION OF ECONOMIC THOUGHT**, 8e covers the history of economics, the philosophies that drive the economic way of thinking, the ideas of the great economic thinkers and their logical connections to the world. You'll see how Robert Solow's pioneering model can be used to discuss recent renewed emphasis on growth theory and technological change and will explore antitrust perspectives and game theory. Conveyancing is designed for law students and new lawyers studying applied land law on the Irish Professional Practice Course. As the fourth edition is published at a time when major reform and modernisation of land law and conveyancing is proposed, the text has been fully revised and updated to include reference to proposed reforms, recently published bills and new legislation enacted. This includes new coverage on the Land Act 2005, the Title Act 2006 and the fundamental changes proposed by the Land and Conveyancing Law Reform Bill 2006. In two volumes, the fourth edition also features updated sample documentation and precedents to enable students to consider the procedural aspects of conveyancing. It includes complete coverage of all the essential knowledge needed when practicing conveyancing, including the legal concept of property, and the protection, acquisition and movement of proprietary interests. The

principles of conveyancing practice are clearly explained, ensuring that this is an essential text for apprentices and practitioners in this field.

This book examines a range of Australian examples within an international context. Part 1 presents an overview of the history and theory of crime prevention, featuring chapters on social prevention, environmental prevention and evaluation. Part 2 explores the practice of crime prevention and the real life challenges of implementation, including policy making, prevention in public places, dealing with social disorder and planning for the future.

International Financial Management is written based on two distinct parts: emphasis on the basics and emphasis on a managerial perspective. As capital markets of the world become more integrated, a solid understanding of international finance has become essential for astute corporate decision making. International Financial Management provides students with a foundation for analysis that will serve them well in their careers ahead. The decision-making process is presented through the

text with the goal of teaching students how to make informed managerial decisions in an evolving global financial landscape.

This text has been written so that it is current with all issues inherent in accounting and auditing practice, particularly in public accounting firms including coverage of the creation of the Public Companies Accounting Oversight Board, the passage of the Sarbanes-Oxley Act, and all of the major pronouncements issued by the AICPA. The text is also designed to provide flexibility for instructors; the twelve chapters focus on the auditing process while the eight modules provide additional topics that can be taught at the instructors' discretion without interrupting the flow of the text.

Law of Persons

This book is for upper-level students, managers and academics who are interested in exploring the messy reality of the contemporary workplace and in considering how things might be done differently. In particular, it offers a critical perspective on

"The law of persons is a dynamic area of the law, and it is this dynamic nature that generates interest in this subject and makes it stimulating to teach and learn. Law of Persons seeks to make this subject area accessible to students, including first-year students. In the law of persons, the common law and legislation have been harmonised with the spirit, purport and objects of the Bill of Rights, while the

values entrenched in the Constitution are permeating every area of the law. The greatest change in our law of persons to date has been the Children's Act 38 of 2005: it had redefined basic concepts, it has revolutionised the parent-child relationship, it has ended the labelling of children in terms of their parents' marital status and it has radically altered the legal status of unmarried fathers. Law of Persons is also available in Afrikaans, and should ideally be used in conjunction with Personeregbronnepunel / Law of Persons Sourcebook"--Provided by publisher.

As with most dynamic activities that are based on social and cultural contexts and rely on interactions, education is a complex and often ambiguous endeavor. Despite this complexity, scholars and educators are often required to find ways of defining and explaining what "good" teaching is and to incorporate these conclusions into teacher education. This book contains eight scholarly articles from various countries around the world and offers unique and up-to-date perspectives on relevant practices and pedagogies for teachers' professional education and development. In this international book, it is argued that there is a significant inspiration and

enrichment to be gained by investigating the policies and practices of teacher education systems from all over the world.

This book focuses on how to improve the teaching and learning of primary level mathematics education within resource-constrained contexts. It builds on two large numeracy projects within South Africa which speak to broader, global concerns and highlight how research and development not only enables one to meet ethical imperatives but also explore how further interventions can be developed. Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education.

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world.

Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume

will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Ethics in communication and media has arguably reached a pivotal stage of maturity in

the last decade, moving from disparate lines of inquiry to a theory-driven, interdisciplinary field presenting normative frameworks and philosophical explications for communicative practices. The intent of this volume is to present this maturation, to reflect the vibrant state of ethics theorizing and to illuminate promising pathways for future research.

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

The Bash Guide for Beginners (Second Edition) discusses concepts useful in the daily life of the serious

Bash user. While a basic knowledge of shell usage is required, it starts with a discussion of shell building blocks and common practices. Then it presents the grep, awk and sed tools that will later be used to create more interesting examples. The second half of the course is about shell constructs such as loops, conditional tests, functions and traps, and a number of ways to make interactive scripts. All chapters come with examples and exercises that will help you become familiar with the theory. Corporate citizenship is a prominent international issue as contemporary corporations are no longer expected to perform financially, but are also expected to have an ethical relationship of responsibility between the corporate itself and the society in which it operates and performs its business activities. Provides an up-to-date theoretical content pertaining to corporate citizenship, providing local and global examples and case studies.

A brand new book, **FUNDAMENTALS OF CHEMICAL ENGINEERING THERMODYNAMICS** makes the abstract subject of chemical engineering thermodynamics more accessible to undergraduate students. The subject is presented through a problem-solving inductive (from specific to general) learning approach, written in a conversational and approachable manner. Suitable for either a one-semester course or two-semester sequence in the subject, this book covers thermodynamics in a complete and mathematically rigorous manner, with an emphasis on solving practical engineering problems. The approach taken stresses problem-solving, and draws from best practice engineering teaching strategies. **FUNDAMENTALS OF CHEMICAL ENGINEERING THERMODYNAMICS** uses examples to frame the importance of the material. Each topic begins with a motivational example that is investigated in context to that topic. This framing of the material is helpful to all readers, particularly to global learners who require big picture insights, and hands-on learners who struggle with abstractions. Each worked example is fully annotated with sketches and comments on the thought process behind the

solved problems. Common errors are presented and explained. Extensive margin notes add to the book accessibility as well as presenting opportunities for investigation. This introductory social work book provides both a theoretical and applied overview of the U.S. social welfare system, with international perspectives throughout. Other strengths include themes of empowerment theory and practice and an ecosystems framework. Part I is devoted to the history of social work in the U.S. as well as issues of economic oppression, social oppression, human rights, and restorative justice. Part II is devoted to social work across the life cycle.

"Given the common acknowledgement that strategy implementation is the greatest challenge to managers in the 21st century and the greatest reason for strategy failure we decided to focus on strategy implementation. Rather than promoting the unrealistic idea of strategy as a purely rational and deliberate outcome, this book acknowledges and explores the idea that strategy is often emergent, messy and experimental and features a number of new chapters, focusing on strategy implementation and change management, resource allocation and responsible leadership. It also includes a more detailed coverage

of managing strategic risk."--Publisher's description.

With an innovative integration of visuals, text, and spatial graphics, *Introduction to Contemporary Geography* presents a modular and highly graphical springboard to introductory geography - ideal for contemporary students and learning styles. This innovative new resource partners best-selling human geography author Jim Rubenstein with environmental and physical geographer Bill Renwick, economic/political/cultural geographer Carl Dahlman, and the information architects at Dorling Kindersley (DK). The authors' approachable prose and DK's bold visual style combine to engage students with little to no science background, encouraging them to become scientifically literate and responsible consumers, readers, and voters.
