Assignment

Heterogeneous Agents in Macro Models – Lake Como School of ...

In the recent literature however, already quite a number of heterogeneous agent models (HAM) have been developed which, at least to some extent, are analytically tractable and for which theoretical results have been obtained supporting numerical simulation results. In this chapter we review a number of dynamic HAM in economics and finance. Most of these models are concerned with financial market applications, but some of them deal with different markets, such as commodity good markets.

Solving Models with Heterogeneous Agents - KS algorithm Wouter J. Den Haan London School of Economics c by Wouter J. Den Haan. ModelKSKS - Individual problemKS - IssuesKS - Overview Individual agent Subject to employment shocks (8 i,1,20,1g) Incomplete markets

Solving Models with Heterogeneous Agents - KS algorithm

We study a class of continuous time heterogeneous agent models with idiosyncratic shocks and incomplete markets. This class can be boiled down to a system of two coupled partial differential equations: a Hamilton-Jacobi-Bellman equation and a Kolmogorov Forward equation, a system that Lasry and Lions (2007) have termed a " Mean Field Game. " We study two concrete model economies to show that ...

building blocks of traditional macroeconomic models: the representative agent and the ag-gregate production function. We introduce a broad class of disaggregated general equilb-rium models with Heterogeneous Agents and Input-Output networks (HA-IO). We charac-

Macroeconomics with Heterogeneous Agents and Input-Output ...

1. Introduction. During the nineties, the first algorithms were developed to solve models with heterogeneous agents and aggregate uncertainty. There are now several algorithms. 2 The method proposed in Reiter (2009) stands out in being much faster than other algorithms. As discussed below, the " Reiter approach " is not suitable for all models, but if it is then it comes with a massive computational advantage.
