Page 21/107

Neuro Linguistic Programming (NLP) - A Beginners Guide

In NLP, linguistics is the study of how the words you speak influence your experience.

Programming draws heavily from learning theory and

Page 22/107

addresses how we code or mentally represent experience. Your personal programming consists of your internal processes and strategies (thinking patterns) that you use to make decisions, solve problems,

Page 23/107

learn, evaluate, and get results.

What Neuro-linguistic Programming Means - dummies

The methods of neuro-linguistic programming are the specific techniques used to perform and teach

Page 24/107

neuro-linguistic programming, a pseudoscience which teaches that people are only able to directly perceive a small part of the world using their conscious awareness, and that this view of the world is filtered by experience, beliefs,
