University of California, San Diego

## **University of California, San Diego**

Neuroscience: the Science of the Brain Inside our heads, weighing about 1.5 kg, is an astonishing living organ consisting of billions of tiny cells. It enables us to sense the world around us, to think and to talk. The human brain is the most complex organ of the body, and arguably the most complex thing on earth.

## **NEUROSCIENCE - McMaster University**

Neuroscience is the study of the brain. The brain is perhaps the most complicated and intricate system that exists – it processes and creates almost every aspect of our conscious experience. The brain isn't merely another organ in our body – we are our brains. This all goes to say – it's pretty important. Over the years, neuroscientists have attempted to clarify the complications and smooth out the intricacies of the brain in order to better understand it, and as a result, better ...
