New communication technologies have reshaped media and politics. But who are the new power players? The Hybrid Media System is a sweeping new theory of how political communication now works. Politics is increasingly defined by organizations, groups, and individuals who are best able to blend older and newer media logics, in what Chadwick terms a hybrid system. From American presidential campaigns to WikiLeaks, from live prime ministerial debates to hotly contested political scandals, from the daily practices of journalists and campaign workers to the struggles of new activist organizations, the clash of media logics causes chaos and disintegration but also surprising new patterns of order and integration. The updated second edition features a new preface and an extensive new chapter applying the conceptual framework to the extraordinary 2016 U.S. presidential campaign, the rise of Donald Trump, and the anti-Trump resistance protests.

The Indian Constitution is one of the world's longest and most important political texts. Its birth, over six decades ago, signalled the arrival of the first major post-colonial constitution and the world's largest and arguably most daring democratic experiment. Apart from greater domestic focus on the Constitution and the institutional role of the Supreme Court within India's democratic framework, recent years have also witnessed enormous comparative interest in India's constitutional experiment. The Oxford Handbook of the Indian Constitution is a wide-ranging, analytical reflection on the major themes and debates that surround India's Constitution. The Handbook provides a comprehensive account of the developments and doctrinal features of India's Constitution, as well as articulating frameworks and methodological approaches through which studies of Indian constitutionalism, and constitutionalism more generally, might proceed. Its contributions range from rigorous, legal studies of provisions within the text to reflections upon historical trends and social practices. As such the Handbook is an essential reference point not merely for Indian and comparative constitutional scholars, but for students of Indian democracy more generally.

These are the isles of sorcerers and hierophants, the seat of the great learning and wisdom that gave birth to the Empire of the God Learners. Here, the sorcerers discovered the secret of the God Learners and so transformed this world and the next. The old mainland of Seshnegi may be the commercial and military heart of the sea-spanning empire, but Jrustela is the empire's soul. No man can call himself accomplished in magic until he has studied in the towers of Jrustela, no man can call himself holy unless he has knelt and studied the Abiding Book that proclaims all faiths are one under Malkion and no man has truly seen wonders until he has walked the cobbled streets of Eradinthanos in the pale light of dawn. Then again, no man has braved danger until he has dived for treasures in sunken Svalwa1, and no man has crossed the thieves of windy Hathinelthor and lived. Travel now to the wondrous isle of Jrustela and seize your future!

One of the most inspiring women of our age, Mary Robinson has spent her life in pursuit of a fairer world, becoming a powerful and influential voice for human rights around the globe. Displaying a gift for storytelling and remembrance, Robinson reveals, in *Everybody Matters*, what lies behind the vision, strength, and determination that made her path to prominence as compelling as any of her achievements. Born in 1944 into a deeply Catholic family—the only girl among five children—she was poised to become a nun before finding her own true voice. Ever since, she has challenged convention in pursuit of fairness—whether in the Church, in government and politics, or in her own family. As an activist lawyer, she won landmark cases advancing the causes of women and marginalized people against the prejudices of the day, and in her twenty years in the Irish Senate she promoted progressive legislation, including the legalizing of contraception. She shocked the political system by winning election as Ireland's first woman president in 1990, redefining the role and putting Ireland firmly on the international stage. Her role as UN high commissioner for human rights, beginning in 1997, was to prove an even bigger challenge: she won acclaim for bringing attention to victims worldwide but was often frustrated both by the bureaucracy and by the willingness to compromise on principle, which reveal the deep and inherent barriers to changing the status quo. Now back in Ireland and heading her Mary Robinson Foundation–Climate Justice, she has found the independence she needs to work effectively on behalf of the millions of poor around the world most affected by climate change. Told with the same calm conviction and modest pride that has guided her life, *Everybody Matters* will inspire anyone who reads it with the belief that each of us can, in our own way, help to change the world for the better.

This book provides the first comprehensive analysis of the impact of globalization on the Indian legal profession. Employing a range of original data from twenty empirical studies, the book details the emergence of a new corporate legal sector in India including large and sophisticated law firms and in-house legal departments, as well as legal process outsourcing companies. As the book's authors document, this new corporate legal sector is reshaping other parts of the Indian legal profession, including legal education, the development of pro bono and corporate social responsibility, the regulation of legal services, and gender, communal, and professional hierarchies with the bar. Taken as a whole, the book will be of interest to academics, lawyers, and policymakers interested in the critical role that a rapidly globalizing legal profession is playing in the legal, political, and economic development of important emerging economies like India, and how these countries are integrating into the institutions of global governance and the overall global market for legal services.

Democracy Falls - a hub of opportunity for those in the Cursed Earth with the skills, gear and guts to try and survive within its gang-patrolled wall. Located a few hundred miles west of Mega City One on the ruins of one of America's ancient heartland capitals, 'D-Falls' is a dream for Cursed Earthers... and a nightmare to the Justice Department. It has always loomed in the distance, standing as a reminder that the Mega Cities are not the only civilisations to thrive in this day and age. The Justice Department has always turned a blind eye to the existence of Democracy Falls, choosing to use its resources more efficiently than laying siege to it. The appearance of a new criminal game in the lower blocks has changed the status quo, forcing the Chief Judges to take action. This new game, called Bloodrace, is well-known to have started in Democracy Falls - and it just claimed its first Judge's life. Now the Justice Department needs a small team of Judges willing to leave the safety of Mega City One to bring justice to the Bloodrace organisers - those who brought the game to MC-'s streets. Everyone is allowed to enter Democracy Falls, even Judges... the only problem is getting back out again. Democracy Falls is a scenario for the Judge Dredd Traveller game setting, placing several Judges in a dangerous and foreign city in the Cursed Earth, where fast cars and faster bullets are normally the Law of the land.

A free open access ebook is available upon publication. Learn more at www.luminosoa.org This sweeping book details the extent to which the legal revolution emanating from the Middle Ages to today. It examines the global proliferation of large corporate law firms—a US invention—along with US legal education practices geared toward those corporate law firms. This neoliberal-inspired revolution attacks complacent legal oligarchies in the name of America-inspired modernism. Drawing on the combined histories of the legal profession, imperial transformations, and the enduring and conservative role of cosmopolitan elites at the top of legal hierarchies, the book details case studies in India, Hong Kong, South Korea, Japan, and China to explain how interconnected legal histories are stories of both revolution and reproduction. Theoretically and methodologically ambitious, it offers a wholly new approach to studying interrelated fields across time and geographies.

The European Union and Europe's New Regionalism

Legal academics and practitioners in recent decades increasingly emphasize the so-called "globalization" of legal education. The diffusion of the Juris Doctor (JD) degree to Australia, Hong Kong, Japan and South Korea, as well as the advent of a very similar Juris Master (JM) degree in China and a shift in the late 1980s and beyond to a new, US-influenced format in India, exemplify shifts toward US legal education practices (Flood 2014). The global and Americanizing trend is evident on the web sites of law schools around the globe, with many law schools competing to be the most "global" in terms of their faculty, curricula, teaching methods, and students. Less pronounced but related to the literature on legal globalization is that on "transnationalization" and transnational processes, which is a strong component of the move toward globalization in legal education. As this book shows, if we look to see what is celebrated as part of globalized law schools and faculties, we see increased cross-border flows of professors and students, teaching of transnational legal subjects, development of particular forms of teaching practice such as legal clinics, explicit focus on transnational rankings, and transnationalized scholarly communities sharing teaching and research methods and approaches across domains of law"--

This report makes recommendations to improve the process by which Members learn and develop their careers. If implemented the recommendations would mean: extending the period between a General Election and the date of first sitting, to allow for a longer period of induction; allocating part of most question times to topical questions; extra debates on topical matters on a weekly basis; shorter debates on most general issues and some legislation; a weekly half-hour slot for debating Select Committee Reports; more comprehensible motions; shorter speeches; greater flexibility on time limits on speeches; and the reintroduction, on a trial basis, of Private Members' Motions in Westminster Hall. This book presents a new approach to studying the European Union's regional and global relevance. It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project: its enlargement, neighborhood, and mega-regional policies. The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward-looking process of region building to an open, selective system of global interactions.

The BBC: the mouthpiece of the Establishment? The BBC is one of the most important institutions in Britain; it is also one of the most misunderstood. Despite its claim to be independent and impartial, and the constant accusations of a liberal bias, the BBC has always sided with the elite. As Tom Mills demonstrates, we are only getting the news that the Establishment wants aired in public. Throughout its existence, the BBC has been in thrall to those in power. This was true in 1926 when it stood against the workers during the General Strike, and since then the Corporation has continued to mute the voices of those who oppose the status quo: miners in 1984; anti-war protesters in 2003; those who offer alternatives to austerity economics since 2008. From the outset much of its activity has been scrutinised by the secret services at the invitation of those in charge. Since the 1990s the BBC has been integrated into the market, while its independence from government and big business has been steadily eroded. The BBC is an important and timely examination of a crucial public institution that is constantly under threat.

Neighbourhood planning offers a critical analysis of community-based planning activity in England, framed within a broader view of collaborative rationality and its limits. From the recent experience of drawing up parish plans, and attempts to connect these to formal policy frameworks, it identifies lessons for future planning at the neighbourhood scale. It is not a manual on community planning practice, nor does it provide a formula for producing parish or neighbourhood plans. But in the context of the latest 'localism' agenda in England it, first, examines the potential contribution of neighbourhood planning to building a 'collaborative democracy' and, second, asks how much movement towards genuine local partnership, and consensus

around development decisions, can be achieved through the rescaling of 'statutory' planning as opposed to expending greater effort locally on building stronger relationships, and generating trust, between 'people and planning'

The reptilian humanoids known as dragonewts are a conflicted race in the Imperial Age. The ideas they have shared with the Dragonspeakers are creating dangerous instabilities in the world and their leaders must now reassess what effect their interference with human cultures has had on Glorantha. The relationship between politicians and broadcasters has always been fraught with tension. Today, every word and act of those who wield power is instantly broadcast and dissected on 24-hour rolling news channels, blogs and Twitter. But in the past, broadcasters were banned by law from debating anything newsworthy and Parliament imprisoned those who dared to report what MPs had said.

Since that censorship ended, the two sides have clashed repeatedly. Live From Downing Street takes us on an absorbing journey through the history of this power struggle, dwelling in fascinating detail on the charismatic key players from radio and television - the Dimblebys, Day, Frost, Walden, Paxman, Humphys - and those who fought back - Churchill, Wilson, Thatcher and Blair. As the BBC's Political Editor, Nick Robinson is uniquely placed to add his own perceptive insights into the controversial issue of impartial reporting, providing a colourful and gripping account of the hard-fought battles for the right to tell the public about the decisions taken on their behalf.
