Beauty Meets Beast in San Francisco Accepting employment as a  
governess after hard times hit her family, medieval scholar

Rosalind Hawkins is surprised when she learns that her mysterious employer has no children, no wife, and she is not to meet with him face to face. Instead, her duties are to read to him, through a speaking tube, from ancient manuscripts in obscure, nearly-forgotten dialects. A requirement for the job was skill in translating medieval French, and she now understands the reason for that requirement, and assumes her unseen employer's interest in the descriptions of medieval spells and sorcery is that of an eccentric antiquary. What she does not realize is that his interest is anything but academic. He has a terrible secret and is desperately searching for something that can reverse the effects of the misfired spell which created his predicament. Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other

television programs.
