Nonlinear Laser Dynamics From Quantum

A distinctive discussion of the nonlinear dynamical phenomena of semiconductor lasers. The book combines recent results of quantum dot laser modeling with mathematical details and an analytic understanding of nonlinear phenomena in semiconductor lasers and points out possible applications of lasers in cryptography and chaos control.

Wiley: Nonlinear Laser Dynamics: From Quantum Dots to ...

The analysis of nonlinear systems in connection with semiconductor lasers also includes quantum cascade lasers and modeling of quantum dot-based devices. Readers will find experimental as well as computational results that are based on nonlinear systems with feedback, time delay and stochastic bifurcation methods.

Nonlinear Dynamics of Quantum Cascade Laser in Ring Cavity A THESIS SUBMITTED TO THE FACULTY OF THE GRADUATE SCHOOL OF THE UNIVERSITY OF MINNESOTA BY HADI MADANIAN IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE Adviser: Prof. Jing Bai June 2011

Nonlinear Dynamics of Quantum Cascade Laser in Ring Cavity

In Lüdge and Schöll study the nonlinear dynamics of quantum-dot lasers, focusing on the turn-on and the resulting relaxation oscillation features. The authors use a microscopic rate-equation model...

Nonlinear Dynamics of Quantum Dot Lasers Nonlinear Auger-scattering-rates between wetting-layer and quantum-dot carriers are crucial in modeling the dynamic response of quantum-dot-lasers. We show that the response is characterized by decoupled electron- and hole dynamics in the dots.

Nonlinear Dynamics of Quantum Dot Lasers

All types of conventional and emerging lasers are covered, such as semiconductor, solid state, fiber, quantum well, quantum dot, quantum cascade, and ring cavity. Meanwhile, the Symposium creates an environment for extensive discussion and potential collaboration with researchers worldwide. Two areas of laser dynamics are covered in the Symposium :

Two areas of laser dynamics are covered in the Symposium

Quantum cascade laser (QCL) as an unipolar semiconductor laser, since its first experimental demonstration in 1994 has become one of the most important and compact coherent light sources, especially in the mid-fared and THz spectral regions, which has wide applications in time-resolved spectroscopy , nonlinear frequency conversion , high-speed ...

Nonlinear Dynamics of Multiple Quantum Well Lasers

Our faculty study chaos two ways: as a phenomenon of classical mechanics, and as quantum chaos, which is the study of the interface between the quantum and classical descriptions for classically chaotic systems. The department offers a second semester of classical mechanics devoted to nonlinear dynamics. Image gallery
