A Future Worth Creating
Manfred Jelinski ist seinen
Autorenkollegen auf dem Gebiet des
Remote Viewing gleich um zwei
Schritte voraus: Nicht nur, daß er
das Phänomen der
Fernwahrnehmung weitgehend
erklären kann, er kennt auch den
Weg, konkret damit zu arbeiten. In
seinem Buch führt der deutsche
Chronist des Remote Viewing durch
eine Welt voller unglaublicher, aber
um so realerer Erlebnisse. Er findet
Antworten auf die Frage, wie man in
die Zukunft schauen kann und
warum die Propheten recht haben,
obwohl es den von ihnen
prophezeiten Weltuntergang nicht
geben wird.

The Pentagon's New Map was one of the most talked-about books of the year - a fundamental reexamination of war and peace in the post-9/11 world that provided a compelling vision of the future. Now, senior advisor and military analyst Thomas P.M. Barnett explores our possible long- and short-term relations with such nations and regions as Iran, Iraq, and the Middle East, China and North Korea, Latin America and Africa, while outlining the strategies to pursue, the entities to create, and the pitfalls to overcome. If his first book was "a compelling framework for confronting twenty-first century problems" (Business Week), Barnett's new book is something more - a powerful road

Dazu liefert er eine Bestandsaufnahme der uns eventuell drohenden Gefahren und erläutert deren Wahrscheinlichkeit. Was könnte passieren, wenn die Sonnenaktivität große Teile unseres Stromnetzes lahmlegt? Drohen uns durch Gen-Manipulation super-resistente Bakterien oder Viren? Dr. Elisabeth Teissier und Gerhard Hynek erklären ihrem Buch, wie sich die Leser optimal auf die Herausforderungen der nächsten

Jahre vorbereiten und liefern so einen wichtigen Beitrag, der Zukunft gelassen und optimistisch entgegenzusehen.

Peter Lemesurier presents a gripping, blow-by-blow account of what we must expect for the next 50 years. He confronts the controversies surrounding Nostradamus and the seer's dating system, and shows that the prophecies retain their potency at the dawning of a new era. For this new edition, Lemesurier includes many verses dealing specifically with the threat of invasion.

Predictions include: The rise of a massive military power destined to move out of Asia via the Middle

East into Europe; The apathy and incompetence of European leaders, with disastrous consequences for their countries; The resulting occupation and devastation of many parts of Europe, including Greece, Italy, Spain and France; Repression of Christianity and persecution of the Church; Severe flooding in various parts of the world, including Britain; A successful counter attack against the Asiatic invaders starting from British shores

The Unofficial Book

Forty years ago, *The Limits to Growth* study addressed the grand question of how humans would adapt to the physical limitations of planet Earth. It predicted that during the first half of the 21st century the ongoing growth in the human ecological footprint would stop-either through catastrophic "overshoot and collapse"-or through well-managed "peak and decline." So, where are we now? And what does our future look like? In the book *2052*, Jorgen Randers, one of the coauthors of *Limits to Growth*, issues a progress report and makes a forecast for the next forty years. To do this, he asked dozens of experts to weigh in with their best predictions on how our economies, energy supplies, natural resources, climate, food, fisheries, militaries, political divisions, cities, psyches, and more will take shape in the coming decades. He then

Page 15/23

synthesized those scenarios into a global forecast of life as we will most likely know it in the years ahead. The good news: we will see impressive advances in resource efficiency, and an increasing focus on human well-being rather than on per capita income growth. But this change might not come as we expect. Future growth in population and GDP, for instance, will be constrained in surprising ways-by rapid fertility decline as result of increased urbanization, productivity decline as a result of social unrest, and continuing poverty among the poorest 2 billion world citizens. Runaway global warming, too, is likely. So, how do we prepare for the years ahead? With heart, fact, and wisdom, Randers guides us along a realistic path into the future and discusses what readers can do to ensure a better life for themselves and their children during the increasing turmoil of

the next forty years.

One of the most enigmatic figures in history, Nostradamus - apothecary, astrologer and soothsayer - is a continual source of fascination. Indeed, his predictions are so much the stock-in-trade of the wildest merchants of imminent Doom that one could be forgiven for forgetting that Michel de Nostredame, 1503-1566, was a figure firmly rooted in the society of the French Renaissance. In this bold new account of the life and work of Nostradamus, Denis Crouzet shows that any attempt to interpret his Prophecies at face value is

misguided. Nostradamus was not trying to predict the future. He saw himself, rather, as 'prophesying', i.e. bringing the Word of God to humankind. Like Rabelais, for whom laughter was a therapy to help one cope with the misery of the times, Nostradamus thought of himself as a physician of the soul as much as of the body. His unveiling of the menacing and horrendous events which await us in the future was a way of frightening his readers into the realisation that inner hatred was truly the greatest peril of all, to which the sole remedy was to live in the love and peace of Christ. This inspired interpretation penetrates the imaginative world of Nostradamus,

a man whose life is as mysterious as his writings. It shows him in a completely new dimension, securing for him a significant place among the major thinkers of the Renaissance.

The Great and Holy War offers the first look at how religion created and prolonged the First World War, and the lasting impact it had on Christianity and world religions more extensively in the century that followed. The war was fought by the world's leading Christian nations, who presented the conflict as a holy war. A steady stream of patriotic and militaristic rhetoric was served to an unprecedented audience, using language that spoke of holy war and

crusade, of apocalypse and Armageddon. But this rhetoric was not mere state propaganda. Philip Jenkins reveals how the widespread belief in angels, apparitions, and the supernatural, was a driving force throughout the war and shaped all three of the Abrahamic religions - Christianity, Judaism, and Islam - paving the way for modern views of religion and violence. The disappointed hopes and moral compromises that followed the war also shaped the political climate of the rest of the century, giving rise to such phenomena as Nazism, totalitarianism, and communism. Connecting remarkable incidents and characters - from Karl Barth to

Carl Jung, the Christmas Truce to the Armenian Genocide - Jenkins creates a powerful and persuasive narrative that brings together global politics, history, and spiritual crisis. We cannot understand our present religious, political, and cultural climate without understanding the dramatic changes initiated by the First World War. The war created the world's religious map as we know it today.
