This book is a hands-on, real-world guide to building and implementing a robust Oracle E-Business Suite System using the new Release, EBS 12.2. It explains the rationale for using an Oracle E-business suite environment in a business enterprise and covers the major technology stack changes from EBS version 11i through R12.2. The book clarifies how to build up an EBS environment from a simple single-node installation to a complex multi-node high available setup. Practical Oracle E-Business Suite focuses on release R12.2, but key areas in R12.1 are also covered wherever necessary. Oracle E-Business suite R12.2 includes major changes in Technology Stack components and introduced many new features. And these changes and new features must be added to the skill set of those individuals responsible for implementing and managing Oracle EBS. Practical Oracle E-Business Suite provides detailed instructions for the Installation of EBS R12.2 in single and multi-node configurations, the logic and methodology used in EBS patching, and cloning of EBS single-node and complex multi-node environments configured with RAC. This book also provides filtered valuable information about such areas as FMW used in EBS 12.2, as well as

performance tuning and EBS 12.2 on engineered system implementations. The following are the key areas of coverage: Introduction to Oracle E-Business Suite, general definition of the EBS product families and the overview of the new system architecture implemented in EBS 12.2 EBS 12.2 single node/multi-node installations along with the EBS 12.2 upgrades EBS 12.2 Application and database tier components along with details about the newly introduced EBS 12.2 FMW components, the new application filesystem (dual fs) and the new patching concept called online patching. Administration utilities including adconfig and rapid clone, along with their usages for managing and maintaining the EBS 12.2 systems. Oracle E-Business Suite: the little r12.2.8 upgrade
essentials for managers and team members

Oracle E-Business: A Fixed Asset Perspective Oracle E-Business Suite provides organizations with the most comprehensive and complete integrated global business applications. Oracle E-Business is Fixed Asset Perspective that bridges the gap between integration, functionality, technical, setup and maintenance, and data conversion. This is the one-stop for all Oracle Assets related data. This book begins with an overview of the various enhancements to the application by release. The first major section covers the integration of Oracle Assets with other Oracle Financial applications as well as with other Asset Lifecycle Management applications. Next functionality is covered: • Asset Additions • Asset Maintenance • CIP Process • Global Asset Transfers • Depreciation • Budgets • Journal Entries • Tax Maintenance • Reporting • Reconciling • Systems Setups and Maintenance Then, technical topics are covered such as aspects of the Fixed Assets key tables among other key tables that Oracle Assets require to report asset details (i.e. General Ledger, Subledger Accounting, Payables, Purchasing, Human Resources, Projects, and Foundational tables). The book concludes with data conversion strategies and considerations.

This IBM® Redpaper™ publication provides the details for setting up an environment on AIX 7.1 on an IBM Power Systems S824 so you can install and upgrade Oracle E-Business Suite Release 12.2. It provides a step-by-step installation of Oracle E-Business Suite Release 12.2 for AIX 7.1. This document also provides a consolidated list of database and application tier patches to upgrade Oracle E-Business Suite from release 12.2.0 to 12.2.4, and explains how to apply patches. This document is written for those who are newly installing Oracle E-Business Suite Release 12.2 version 12.2.0 and upgrading to 12.2.4 on an IBM Power Systems™ server with AIX® 7.1. It provides a sample two-tier installation of Oracle E-Business Suite Release 12.2 version 12.2.0 on two AIX logical partitions and steps for upgrading to version 12.2.4. The sample installation of Oracle EBusiness Suite Release 12.2 version 12.2.0 and upgrade to 12.2.4 also proves their interoperability with IBM Power Systems servers with POWER8™ processor technology. This document assumes that the reader has an in-depth knowledge of IBM AIX, Oracle Database 11g, and Oracle E-Business Suite.

The Oracle E-Business Suite 12 Supply Chain Certified Implementation Specialist: Oracle Inventory certification indicates a functional foundation in E-Business Essentials including skills such as how to access and navigate within the R12 E-Business Suite, how to enter data, retrieve information in the form of a query and access online help. Through preparation for the exam, you will also gain a basic understanding of the features, functions and benefits of Oracle Inventory. You will be able to add items, enable lot control, enable serial control, enable dual unit of measure control, perform inventory transfers, perform inventory replenishment, perform a cycle, view on-hand quantities, create reservations, and setup material statuses. Clearing the Certification will not automatically lead you to a job. However a Certification with some project experience will certainly open a lot of doors for you. The consultants who will benefit the most from a certification are the ones with typically less than 2 year's project experience. This is not to say that consultants with higher experience will not benefit, but at that level, having a certification matters much less. So if you have little or no Oracle Inventory experience, you should get yourself certified, get some project experience, and then the whole of the Oracle

applications World is open for you to explore. Helping you with the first step on your ladder to success is this book!
