Oracle Utilities Application Framework

application architecture. Application Architecture The Oracle Utilities Application Framework application is deployed on multiple tiers. Refer to the Oracle Utilities Customer Care and Billing Server Administration Guide for a more .

Oracle Utilities Application Framework Architecture

The Oracle Utilities Application Framework is a reusable, scalable and flexible java based framework which allows other products to be built, configured and implemented in a standard way. Note: Even

though the Framework is built in java it can be integrated with COBOL based extensions for backward compatibility.

What is the Oracle Utilities Application Framework ...

The Oracle Utilities Application Framework (OUAF) Configuration Tools boot camp outlines key features that allow OUAF-based products to be extended by populating metadata instead of applying programming.

Oracle Utilities Application Framework Technical Overview

Oracle America, Inc., 500 Oracle Parkway, Redwood City, CA 94065. This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software or

Oracle Utilities Application Framework

The Oracle Utilities Application Framework provides a configurable capability to detect business events and provide payload into a capability that can send that product payload, using various formats and transports, in real time, batch or via middleware to external systems. Algorithm.

OUAF Integration Architecture | Oracle The Shorten Spot ...

The Administration Guide describes how to implement and configure the Oracle

Utilities Application Framework. This includes: Defining General Options on page 5 Access Groups, Data Access Roles and Users on page 38 User Interface Tools on page 44 Database Tools on page 66 To Do Lists on page 94 Defining Background Processes on page 110
