

Organizing Schools For Improvement Lessons From Chicago By Bryk Anthony S Sebring Penny Bender Allensworth Elaine Published By University Of Chicago Press 2010

In 1988, the Chicago public school system decentralized, granting parents and communities significant resources and authority to reform their schools in dramatic ways. To track the effects of this bold experiment, the authors of *Organizing Schools for Improvement* collected a wealth of data on elementary schools in Chicago. Over a seven-year period they identified one hundred elementary schools that had substantially improved—and one hundred that had not.

This book by current and former researchers from the UChicago Consortium provides a detailed analysis of why students in 100 public elementary schools in Chicago were able to improve substantially in reading and math over a seven year period and students in another 100 schools were not. Using massive longitudinal evidence, the study yields a comprehensive set of school practices and school and community conditions that promote improvement, noting that the absence of these spells stagnation.
