Meet Lily Wilder: New Yorker, lawyer extraordinaire, blushing bride. And totally incapable of being faithful to one man. Lily's fiancé Will is a brilliant, handsome archaeologist. Lily is sassy, impulsive, fond of a good drink (or five) and has no business getting married. Lily likes Will, but does she love him? Will loves Lily, but does he know her? As the wedding approaches, Lily's nights—and mornings, and afternoons—of booze, laughter and questionable decisions become a growing reminder that the happiest day of her life might turn out to be her worst mistake yet. Unapologetically sexy with the ribald humor of Bridesmaids, this joyously provocative debut introduces a self-assured protagonist you won't soon forget.

Painting Fun with Peppa Pig! Grab your paintbrush, it's time to get creative with Peppa Pig! Boys and girls ages 3 to 7 will love this activity book featuring 16 different watercolor paints, a sturdy paintbrush, and tons of fun pictures of Peppa dressed as a ballerina, George playing with Mr. Dinosaur, the whole family at the beach, and much more! Peppa Pig is a loveable little piggy who lives with her younger brother George, Mummy Pig and Daddy Pig. Peppa loves playing games, dressing up, visiting exciting places, and making new friends—but her absolute favorite thing is jumping up and down in muddy puddles! Peppa Pig airs daily on Nick Jr. and focuses on strong brand values that parents and kids identify with: family, friendship, trust, humor and life experiences.

The full range of text types to meet your shared and guided reading/writing needs at Key Stage 2. "Dolvett offers a dieting inficta: easy, effective, and friendly to cheaters. He helps trick your metabolism into cooperating with his rapid weight loss formula for success." --Mehmet Oz, M.D. Want to finally lose the weight and keep it off? Want to be able to eat the foods you love? Reaching your goals can only happen when you don't feel deprived and you continue to stay motivated. Now, celebrity trainer and star of the hit reality series The Biggest Loser, Dolvett Quince, tells you how to do all of that and more in his revolutionary program, THE 3-1-2-1 DIET. This 21-day program works by manipulating your body's natural tendency to slow its metabolic rate in response to calorie restriction. It takes a new approach to getting lean-one scientifically based on changing up food and calories to tap into your body's potential to burn fat. This unconventional plan results in greater muscle and less fat than any other diet you've ever tried. Dolvett's effective eating plan is as easy as 3-1-2-1: three days of clean eating, one day of cheating, two more days of clean eating, and one final reward meal at the end of the week. No foods are off limits and you will never feel deprived because the plan is flexible enough to fit into any lifestyle. You'll lose weight fast-10 pounds or more in just 21 days-and you won't plateau. Dolvett's simple meal plans and delicious, easy-to-prepare recipes, together with his fast and effective workouts that combine cardio and body-shaping moves, will have you back in your skinny jeans in less than three weeks!

From an Ivy League dean and a college admissions expert, a guide to help parents support their children as they navigate their way to college. The College Conversation is a comprehensive resource for mapping the path through the college application process that provides practical advice and reassurance to keep both anxious parents and confused children sane and grounded. Rather than adding to the existing canon of "How to Get In" college guides or rankings, Eric Furda and Jacques Steinberg provide a step-by-step approach to having the tough conversations on this topic with less stress and more success. The book is organized around key discussions and themes that trace the chronological arc of admissions and financial aid--beginning before the assembly of a list of potential colleges and continuing through the receipt of decisions--with a final section that includes advice on the first year of college. The topics include preliminary conversations about the search, and specifically how parents can think about their children's interests and what kind of college would best suit them; choosing a college (based on its curriculum, culture, and community); writing the most effective essays; assessing acceptances, including considerations of finances and aid; and making the transition from high school to college life. The College Conversation will provide parents, students, and counselors with the credible, level-headed information often missing in this process, as well as a much-needed dash of perspective borne of experience.

Despite efforts to increase renewables, the global energy mix is still likely to be dominated by fossil-fuels in the foreseeable future, particularly gas for electricity and oil for land, air and sea transport. The reliance on depleting conventional oil and natural gas resources and the geographic distribution of these reserves can have geopolitical implications for energy importers and exporters. Global Energy Policy and Security examines the security of global and national energy supplies, as well as the sensitivity and impacts of sustainable energy policies which emphasize the various political, economic, technological, financial and social factors that influence energy supply, demand and security. Multidisciplinary perspectives provide the interrelated topics of energy security and energy policy within a rapidly changing socio-political and technological landscape during the 21st century. Included are two main types of interdisciplinary papers. One set of papers deals with technical aspects of energy efficiency, renewable energy and the use of tariffs. The other set of papers focuses on social, economic or political issues related to energy security and policy, also describing research, practical projects and other concrete initiatives being performed in different parts of the world. This book will prove useful to all those students and researchers interested in the connections between energy production, energy use, energy security and the role of energy policies.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. \*Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State--and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years--it has been suggested that an account of my life and fortunes would not be uninteresting to the public. Designing With Creo Parametric 2.0

Designing with Creo Parametric 2.0 provides the high school student, college student, or practicing engineer with a basic introduction to engineering design while learning the 3D modeling Computer-Aided Design software called Creo Parametric from PTC. The topics are presented in tutorial format with exercises at the end of each chapter to reinforce the concepts covered. It is richly illustrated with computer screen shots throughout. Above all, this text is designed to help the reader expand their creative talents and communicate their ideas through the graphics language. Because it is easier to learn new information if you have a reason for learning it, this textbook discusses design intent while you are learning Creo Parametric. At the same time, it shows how knowledge covered in basic engineering courses such as statics, dynamics, strength of materials, and design of mechanical components can be applied to design. You do not need an engineering degree nor be working toward a degree in engineering to use this textbook. Although FEA (Finite Element Analysis) is used in this textbook, its theory is not covered. The first two chapters of this book describe the design process. The meat of this text, learning the basic Creo Parametric software, is found in Chapters 3 through 6. Chapters 7, 8, and 12 deal with dimensioning and tolerancing an engineering part. Chapters 9 and 10 deal with assemblies and assembly drawings. Chapter 11 deals with family tables used when similar parts are to be designed or used. Chapter 13 is an introduction to Creo Simulate and FEA.

Mallard Fillmore lampoons everything from political correctness to Phil Oparah, and Geraldo to our government's insatiable appetite for spending our money. His marvelous supporting cast includes wickedly wonderful caricatures of everyone who's anyone, from Hollywood to D.C. to Arkansas.

Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But KASHER IN THE RYE is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control--his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

\*My Little Loves\* is a short narrative about the author's pets, mostly felines, and how she and they loved and lived. The author nursed them through sicknesses, and grieved deeply when Harley just would not accept her as his Human. She panicked when Sheba got out of the house, and rejoiced when he was reunited with her. Her love of cats blossomed from a very young age and has only grown over time. My Little Loves is a heart-warming story for all animal lovers, especially those who have been chosen and are owned by their cats.
