Like Huck Finn, Lane sees a river journey as a portal to change, but unlike Twain's character, Lane isn't escaping. He's getting intimate with the river that flows right past his home in the Spartanburg suburbs. Lane's three hundred mile float trip takes him down the Broad River and into Lake Marion before continuing down the Santee River.

H.C. and Lucille Holling tell the stories of cowboys, ranching and more with lavish illustrations. Thrill of the Paddle is the ultimate guide to the white-knuckle, adrenaline-pumping and increasingly popular brand of extreme canoeing where paddlers "shoot" rapids and other fast water. Paul Mason's eagerly awaited new guide now completes the trilogy with Path of the Paddle and Song of the Paddle by his father - the late Bill Mason, one of North America's most respected canoeists. In each chapter of Thrill of the Paddle are numerous photographs, diagrams and illustrations, showing some of the greatest challenges in canoeing. Thrill of the Paddle provides detailed instructions on maneuvering a canoe through fast-running Class 3 and 4 water conditions. The International Scale of River Difficulty is the U.S. version of an international rating system used to compare river difficulty throughout the world. CLASS 3: INTERMEDIATE Rapids with moderate, irregular waves that may be difficult to avoid and that can swamp an open canoe. Complex maneuvers in fast current and good boat control in tight passages or around ledges are often required. Large waves or strainers may be present but are easily avoided. Strong eddies and powerful current effects can be found, particularly on large-volume rivers. CLASS 4: ADVANCED Intense, powerful but predictable rapids requiring precise boat handling in turbulent water. Depending on the character of the river, there may be large, unavoidable waves and holes or constricted passages demanding fast maneuvers under pressure. There is also sound advice on selecting the best boats and safety equipment for the journey, along with instructions for handling a paddle in the most adverse and demanding conditions, tips and tricks for successfully avoiding overturning a canoe, and instructions on recovery. The many checklists help readers carefully plan their trip. In fact, this book is an adventure itself, and not to be missed.

As far as Warren Richey knew, his life was on course: A reporter with a beautiful wife and talented son, Richey couldn't imagine how it could be any better....Then his marriage falls apart and he can't imagine how it could be any worse. The divorce leaves Richey questioning everything, while struggling to find a way forward. To get his bearings, he enters the first Ultimate Florida Challenge, an all-out twelve-hundred-mile kayak race around Florida. The UFC is less of a race than it is a dare or a threat. The thirty-day deadline sets a grueling, twenty-four-hour-a-day pace through shark-, alligator-, and even python-infested waters. But those twelve hundred miles are only a fraction of a journey that pulls Richey back to when he was embedded with troops in Iraq, reporting on missing children, and hiking the mountains of Montana with his son, and shows him where he went wrong, where he went right, and how to do it better the second time around. Warren Richey's memoir Without a Paddle is a remarkable physical and emotional journey that cuts to the heart of what it means to be a man, a husband, and a father.

After reading J. A. Baker ' s fifty-year-old British nature classic *The Peregrine*, John Lane found himself an ocean away, stalking resident red-shouldered hawks in his neighborhood in Spartanburg, South Carolina. What he observed was very different from what Baker deduced from a decade of chronicling the lives of those brooding migratory raptors. Baker imagined a species on the brink of extinction because of the use of agricultural chemicals on European farms. A half century later in America, Lane found the red-shouldered hawks to be a stable Anthropocene species adapted to life along the waterways of a suburban nation. Lane watched the hawks for a full year and along the way made a pledge to himself: Anytime he heard or saw the noisy, nonmigratory hawks in his neighborhood, he would drop whatever he was doing and follow them on foot, on bike, or in his truck. The almanac that results from this discipline considers many questions any practiced amateur naturalist would ask, such as where and when will the hawks nest, what do they eat, what are their greatest threats, and what exactly are they communicating through those constant multinoted cries? Lane ' s year following the hawks also led him to try to answer what would become the most complex question of all: why his heart, like Baker ' s, goes out so fully to wild things.

Discover how adaptations make the ocean a perfect habitat for whales, lobsters, sea horses, and many, many more animals.

In the summer of 1967 Ed Gillet achieved what no person has accomplished before or since, a solo crossing from California to Hawaii by kayak. Gillet, at the age of 36 an accomplished sailor and paddler, navigated by sextant and always knew his position within a few miles. Still, Gillet underestimated the abuse his body would take from the relentless, pounding, swells of the Pacific, and early into his voyage he was covered with salt water sores and found that he could find no comfortable position for sitting or sleeping. Along the way he endured a broken rudder, among other calamities, but at last reached Maui on his 63rd day at sea, four days after his food had run out. Dave Shively brings Gillet ' s remarkable story to life in this gripping narrative, based on exclusive access to Gillet ' s logs as well as interviews with the legendary paddler himself.
