Read La Carmina's posts on the Penguin Blog. A cookbook that thinks outside the bento box and brings the popular Japanese trend of kawaii (all things cute) to the American kitchen. Hello Kitty, Pokémon, Super Mario, Astroboy... American pop culture has been invaded by big-headed, dewy-eyed characters from Japan. The cult of kawaii (ka-why-ee, or all things cute) has spread to every aspect of living—including food. Take Japan's wackiest new trend: school lunches dolled up as adorable creatures. They're feasts for the eyes, but their ingredients such as natto and nori don't exactly sit well with Western stomachs. Cute Yummy Time interprets this Japanese phenomenon for the American palate. Using familiar foods, La Carmina turns mundane meals into adorable sensations. A risotto ball becomes a curious hedgehog; chicken sandwiches are dressed as chicks. Entertaining has never been so endearing with a blue cheese blowfish for a beach party or strawberry lovers in chocolate crepe robes for Valentine's Day. Each recipe includes step-by-step instructions, illustrations, and eye-popping full-color photos. Watch a Video

Written by an educator, Much More Than a Learning Center presents a fun and educational method for setting up your Kindergarten classroom and creating activities to bring success to each and every student. Described by one of her principals as a "beehive of activity", this exciting system was developed by the author and teacher, Ruth Prevost. The book begins by clearly explaining how to set up the room and how to easily arrange and mix the students each day so everyone has the occasion to work with each of their classmates. The students not only receive in-depth studies in all the basics, but they also have many opportunities to dig deeper into activities they enjoy. In the lessons, the author includes her personal experiences of living overseas, travels, and her love of science. The entire year is conveniently presented in a chart that can be used as your lesson plans for the year or you can use the system's flexibility to include your own experiences and needs. Each activity is explained in simple terms and is supported with clear detailed illustrations. This system gives the teacher more time to work with the students individually as well as in groups, and it allows the children to learn at their own rate in a non-threatening environment because they know the routine, are relaxed, and have fun while learning.
