Petroleum Engineering Principles And Practice

The Principles and Practice of Engineering (PE) exam tests for a minimum level of competency in a particular engineering discipline. It is designed for engineers who have gained a minimum of four years' post-college work experience in their chosen engineering discipline. The PE Petroleum exam is computer-based and administered one day per year. Like other PE exams with small examinee populations, this is a single-day testing event similar to the current pencil-and-paper exams.
