First published in 1989 as Tuning New Generation Engines, this best-selling book has been fully updated to include the latest developments in four-stroke engine technology in the era of pollution controls, unleaded and low-lead petrol, and electronic management systems. It explains in non-technical language how modern engines can be modified for road and club competition use, with the emphasis on power and economy, and how electronic management systems and emission controls work.

This manual covers a range of Peugeot scooter models including the popular 50cc V-Clic, the third generation Speedflight, Vivacity 3, Kisbee and Tweet. All engine types are covered.
