Prehospital Emergency Medicine (PHEM) is a new and evolving field within Prehospital Care and involves the delivery of safe prehospital critical care to seriously ill or injured patients, and safe transfer to or between hospitals. It covers a broad range of medical and traumatic conditions, interventions, clinical providers and physical environments. ABC of Prehospital Emergency Medicine is the first text to provide a comprehensive overview of this field and with an international team of expert authors is essential reading to anyone involved in the delivery of Prehospital Emergency Medicine and Prehospital Care. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from iTunes, Google Play or the MedHand Store.

Based on concepts of active learning, student engagement, and hybrid course design, the EMT Flipped Classroom serves as a course roadmap to provide a cooperative and successful learning experience. The flipped classroom model dedicates class time to resolving misconceptions through collaborative problem-solving activities, elevating knowledge into application-level tasks and skills practice, and increasing engagement and confidence. Students interact with primary source content outside of the classroom to develop foundational knowledge. The EMT Flipped Classroom delivers primary source content in a variety of engaging formats, including an Emergency Care and Transportation of the Sick and Injured, Eleventh Edition eBook and Interactive and Virtual Mentor Lectures. The course features student-directed coursework, including problem-solving activities, peer-to-peer activities, and student coaching, with competency checks throughout. Sample activities include: Build It!: Students use different objects and materials to build models relating to the lesson topic. Trauma Tango: Students memorize and practice performing the steps of patient assessment by creating correlating dance moves. Rap Songs: Students create rap songs based on medical terminology or medication that EMTs administer, and present their songs to the class. Go On You: Students put on personal protective equipment (PPE) and are squirted with various types of "goo" to show the importance of properly donning and doffing PPE. Challenge Scenario: Students act out a complex scenario that contains multiple issues and requires strong problem-solving skills. EMT Flipped Classroom is designed to help educators shift from the role of lecturer to the role of guide and facilitator, allowing traditional instructor-centered classrooms to transform into student-centered learning environments where instructors can have an even greater impact on student outcomes.

The only book featuring nursing care plans for all core clinical areas. Swearingen's All-in-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Reflecting the 2010 Emergency Cardiovascular Care guidelines, Mosby's Paramedic Textbook, 4th Edition provides a comprehensive learning tool for both first-time and refresher paramedic students. Coverage includes an overview of key subjects such as pharmacology, airway management, medical disorders, patient assessment, and trauma. ALS patient care skills are presented step by step, both in the book and in online video clips. New to this edition are nine new chapters, many new topics, and 150 new photos. Written by paramedic expert Mick Sanders, Mosby's Paramedic Textbook follows the National EMS Education Standards and offers complete coverage of the National Standard Curriculum (NSC) for the EMT-Paramedic. More than 1,000 illustrations -- including 150 that are NEW -- accurately present different techniques and skills. Chapter openers, objectives and key terms set the stage for learning. Advanced Life Support (ALS) skills are presented step by step and in full color. Critical thinking questions help in understanding concepts and in applying them to patient care. A summary and a list of references in each chapter make review easier. A herbal appendix in the pharmacology chapter provides access to herbal content. Drug monographs on the Evolve companion website include Mosby's Essential Drugs, with instant access to comprehensive, up-to-date information on the medications that are administered by paramedics as well as those most commonly prescribed to patients. NEW! Nine new chapters and thoroughly updated content align the text with the new National EMS Education Standards and reflect the 2010 ECC (Emergency Cardiovascular Care) guidelines. NEW topics include coronary bypass, endocarditis, adult IO infusion, bird flu, new fluid resuscitation guidelines for trauma patients, drugs of abuse (Vicodin, Oxycotin), prediabetes, and management of hypothermia and drowning. NEW Show Me The Evidence boxes show the value and impact of evidence-based research. NEW Did You Know? boxes supplement chapter content with interesting and relevant information. NEW Look Again feature includes cross-references and specific page numbers for easy review of information that was covered in earlier chapters. NEW farm considerations in the Trauma section enhance rural practice with the kinematics of farm machinery incidents. Additional Critical Thinking boxes encourage the application of critical thinking skills to "real-life" EMS. Additional cultural considerations enhance your ability to deal with the issues of multicultural patients. NEW Advanced Practice Procedures in Critical Care appendix provides an overview of specialty procedures for paramedics who work in critical care settings. Revised and updated Emergency Drug Index reflects the new 2010 ECC guidelines with coverage of more than 75 emergency drugs, their dose and administration, onset and duration, indications and contraindications, adverse reactions, and special considerations.

Written with health professions students in mind, the Third Edition of Anatomy and Physiology for Health Professionals offers an engaging, approachable, and comprehensive overview of human anatomy and physiology. The Third Edition features a total of six multifaceted "Units" which build upon an understanding of basic knowledge, take readers through intermediate subjects, and finally delve into complex topics that stimulate critical thinking. Heavily revised with updated content throughout, chapters include useful features, such as Common Abbreviations, Medical Terminology, the Metric System and more! Students will want to take advantage of the many resources available to reinforce learning—including Test Your Understanding questions that regularly assess comprehension, flash cards for self-study, an interactive eBook with more than 20 animations, and interactive and printable Lab Exercises and Case Studies.

The Crush Syndrome (and Lessons Learned from the Marmara Earthquake)

(GEMS)

All-in-One Care Planning Resource

ARF induced by traumatic rhabdomyolysis and crush syndrome is a well-known complication occurring in the wake of natural or manmade disasters. As a matter of fact, it is the second most frequent cause of death, following the direct traumatic impact. Early recognition of the crush syndrome and rapid initiation of fluid replacement is essential as this can dramatically reduce the incidence of ARF. After the Marmara earthquake of 1999, the Turkish Society of Nephrology, in collaboration with the Renal Disaster Relief Task Force of the International Society of Nephrology, prepared special questionnaires to obtain patient data and follow-up information to analyze the extent of the nephrological problems. This book is based on the 639 cases consequently documented, constituting an unprecedented collection of first-hand experience on crush syndrome-related ARF following earthquakes. In addition to the data / analysis gained from the Marmara earthquake, each chapter also summarizes classical information on crush syndrome. In every major natural catastrophe, a rapid, appropriate and effective international response is essential to minimize losses and be able to adequately treat victims. This can be achieved only by rational planning and the establishment of an infrastructure composed of trained personnel, equipment, supplies and transportation that can be mobilized at a few hours' notice is essential. This book has been written with the intent to make use of the experiences made after the Marmara earthquake to save more lives in similar future disasters.

Both editors are active duty officers and surgeons in the U.S. Army. Dr. Martin is a fellowship trained trauma surgeon who is currently the Trauma Medical Director at Madigan Army Medical Center. He has served as the Chief of Surgery with the 47th Combat Support Hospital (CSH) in Tikrit, Iraq in 2005 to 2006, and most recently as the Chief of Trauma and General Surgery with the 28th CSH in Baghdad, Iraq in 2007 to 2008. He has published multiple peer-reviewed journal articles and surgical chapters. He presented his latest work analyzing trauma-related deaths in the current war and strategies to reduce them at the 2008 annual meeting of the American College of Surgeons. Dr. Beekley is the former Trauma Medical Director at Madigan Army Medical Center. He has multiple combat deployments to both Iraq and Afghanistan, and has served in a variety of leadership roles with both Forward Surgical Teams (FST) and Combat Support Hospitals (CSH).

Intravenous (IV) Therapy is one of the most invasive procedures handled in the prehospital environment. Proficiency in IV therapy technique is important for most procedures required in advanced life support. Intravenous Therapy for Prehospital Providers prepares emergency medical personnel for the job of administering or assisting with the administration of IV therapy. This book is part of the EMS Continuing Education Series.Written to teach prehospital professionals about IV therapy, important topics covered include principles of fluid balance, IV techniques and administration, infection control, causes and treatment of shock, and altered level of consciousness. A section on practice calculations explains step-by-step how to calculate IV fluid dosage. Age-specific considerations (pediatric and geriatric) and legal issues are covered in their own chapters. The appendices include IV starts log sheets and patient report forms that can be used by IV administrators on the job.This book is part of the EMS Continuing Education Series. As an EMS provider, you know that your education does not stop when you finish your initial training. The things you learn in the field and in continuing education classes give you the extra skills and knowledge to make you the best provider you can be. The EMS Continuing Education Series was created to help you take that extra step toward not just being a great provider, but an outstanding one.

Garbo on Titanic Directed by Alfred Hitchcock! It almost happened!The truth of 1953's movie Titanic is buried in studio archives. Stripped of its original title, Nearer My God to Thee, it was soon rendered secondary to more realistic films. Amid special computer effects and historically accurate epics, the Hollywood version became a dinosaur almost immediately, not quite vanity film-yet epitomizing an arrogant studio system. More mysterious than critics believed, it is disrespected and forgotten no more. New research suggests this was a Hollywood movie with a supernatural caste to the cast. The real story of making a Titanic movie can now be told.

Fully revised to meet current guidelines, Pharmacology for the Prehospital Professional, Second Edition offers a complete and practical understanding of pharmacology in the prehospital setting.The Second Edition provides a unique problem-based approach to ensure that you, as a prehospital provider, are prepared to effectively administer the drugs your patients need. Clinical scenarios present case information just as you will learn it in the classroom and encounter it in the field. By placing each drug in its relevant context, this text teaches you to identify the proper drug for a specific patient in a specific situation. This Second Edition includes: Contextualized profiles of over 90 drugs used in prehospital care for quick identification at critical moments. Problem-oriented approaches to real scenarios encountered in the field. Step-by-step procedural descriptions of pharmacologic processes commonly performed in the prehospital setting. A Medication Math chapter that strengthens your dosage-calculation skills. Legal Aspects and Risk Management coverage to help you avoid common mistakes made in prehospital care. Review questions that reinforce important chapter concepts and test your understanding.

Think back to a time when paramedics didn't exist. When "drivers" simply brought injured patients to the hospital. When the EMS industry was in its infancy. A time before Nancy Caroline. Dr. Caroline's work transformed EMS and the entire paramedic field. She created the first national standard curriculum for paramedic training in the United States. She also wrote the first paramedic textbook:Emergency Care in the Streets. The impact that Dr. Caroline had on EMS and health care spanned across the U.S. and abroad. From establishing EMS systems to training paramedics, to providing better nourishment and health care for orphans, her work had a profound impact on humanity. Throughout her life, Dr. Caroline brought a sense of excitement, joy, and humor to her work. The American Academy of Orthopaedic Surgeons is proud to continue Dr. Caroline's legacy. Her sense of excitement and humor live on in this text, which is dedicated to her. The Sixth Edition honors Dr. Caroline's work with a clear, fun, understandable writing style for which she was known. Welcome back a familiar training companion to your classroom! Say hello to Sidney Sinus, AV Abe, and a cast of memorable characters and amusing anecdotes. Make

leaving for your students more fun!

The Tactical Emergency Casualty Care Course Manual is the printed component for the NAEMT's 16-hour continuing education Tactical Emergency Casualty Care (TECC) Course. It may be used by both instructors and students as a resource to prepare for the TECC course and as a reference that discusses the current best practices for EMS providers to utilize in the response to and care of patients in a civilian tactical environment. The TECC Course does not offer certification as a tactical medic it is intended to teach all EMS providers the best patient care and safety practices in a civilian tactical environment, such as an active shooting hostile event. Composed of 10 lessons, The TECC Course Manual will: Cover the phases of care in a civilian tactical environment, Describe step-by-step the life-saving skills that may be performed in a civilian tactical environment, Provide safety and survival strategies for EMS providers and their patients In addition to the TECC Course Manual, instructors may also purchase the TECC Online Instructors Toolkit (9781284483888). This resource features 10 lesson presentations in PPT, as well as interactive patient simulations and skill stations that allow students to gain experience in a safe environment monitored by experienced EMS providers.

How can we meet the special needs of children for emergency medical services (EMS) when today's EMS systems are often unprepared for the challenge? This comprehensive overview of EMS for children (EMS-C) provides an answer by presenting a vision for tomorrow's EMS-C system and practical recommendations for attaining it. Drawing on many studies and examples, the volume explores why emergency care for children—from infants through adolescents—must differ from that for adults and describes what seriously ill or injured children generally experience in today's EMS systems. The book points the way to integrating EMS-C into current emergency programs and into broader aspects of health care for children. It gives recommendations for ensuring access to emergency care through the 9-1-1 system; training health professionals, from paramedics to physicians, from paramedics to physicians; educating the public; providing proper equipment, protocols, and referral systems; improving communications among EMS-C providers; enhancing data resources and expanding research efforts; and stimulating and supporting leadership in EMS-C at the federal and state levels. For those already deeply involved in EMS efforts, this volume is a convenient, up-to-date, and comprehensive source of information and ideas. More importantly, for anyone interested in improving the emergency services available to children—emergency care professionals from emergency medical technicians to nurses to physicians, hospital and EMS administrators, public officials, health educators, children's advocacy groups, concerned parents and other responsible adults—this timely volume provides a realistic plan for action to link EMS-C system components into a workable structure that will better serve all of the nation's children.
