Paul Pimsleur spent his career researching and perfecting the precise elements anyone can use to learn a language quickly and easily. Here are a few of his “ secrets ” : The Principle of Anticipation In the nanosecond between a cue and your response, your brain has to work to come up with the right word. Having to do this boosts retention, and cements the word in your mind. Core Vocabulary Words, phrases, and sentences are selected for their usefulness in everyday conversation. We don ' t overwhelm you with too much, but steadily increase your ability with every lesson. Graduated Interval Recall Reminders of new words and structures come up at the exact interval for maximum retention and storage into your long-term memory. Organic Learning You work on multiple aspects of the language simultaneously. We integrate grammar, vocabulary, rhythm, melody, and intonation into every lesson, which allows you to experience the language as a living, expressive form of human culture. Learning in Context Research has shown that learning new words in context dramatically accelerates your ability to remember. Every scene in every Pimsleur lesson is set inside a conversation between two people. There are no drills, and no memorization necessary for success. Active Participation The Pimsleur Method + active learner participation = success. This method works with every language and every learner who follows it. You gain the power to recall and use what you know, and to add new words easily, exactly as you do in English. The Mandarin Chinese Language Over one billion people speak Chinese. The two most common dialects are Mandarin and Cantonese. They are not mutually intelligible. Mandarin is the official language in Mainland China, Taiwan, and Singapore. The Mandarin dialect is used in most Chinese schools, and in most TV programs, movies, and radio stations throughout the country, even in Guangzhou (formerly Canton), where people speak Cantonese in their daily lives. Mandarin is one of the six official languages of the United Nations. Lessons include shopping, visiting friends, going to a restaurant, plans for the evening, car trips, and talking about family. You'll be able to speak comfortably about things that happened in the past and make plans for the future. One hour of recorded Cultural Notes are included at the end of Lesson 30. These notes are designed to provide you with some insight into Mandarin Chinese culture. A Notes booklet is also included. The Pimsleur Method We make no secret of what makes this powerful method work so well. Paul Pimsleur spent his career researching and perfecting the precise elements anyone can use to learn a language quickly and easily. Here are a few of his "secrets": The Principle of Anticipation In the nanosecond between a cue and your response, your brain has to work to come up with the right word. Having to do this boosts retention, and cements the word in your mind. Core Vocabulary Words, phrases, and sentences are selected for their usefulness in everyday conversation. We don't overwhelm you with too much, but steadily increase your ability with every lesson. Graduated Interval Recall Reminders of new words and structures come up at the exact interval for maximum retention and storage into your long-term memory. Organic Learning You work on multiple aspects of the language simultaneously. We integrate grammar, vocabulary, rhythm, melody, and intonation into every lesson, which allows you to experience the language as a living, expressive form of human culture. Learning in Context Research has shown that learning new words in context dramatically accelerates your ability to remember. Every scene in every Pimsleur lesson is set inside a conversation between two people. There are no drills, and no memorization necessary for success. Active Participation The Pimsleur Method + active learner participation = success. This method works with every language and every learner who follows it. You gain the power to recall and use what you know, and to add new words easily, exactly as you do in English. The Mandarin Chinese Language Over one billion people speak Chinese. The two most common dialects are Mandarin and Cantonese. They are not mutually intelligible. Mandarin is the official language in Mainland China, Taiwan, and Singapore. The Mandarin dialect is used in most Chinese schools, and in most TV programs, movies, and radio stations throughout the country, even in Guangzhou (formerly Canton), where people speak Cantonese in their daily lives. Mandarin is one of the six official languages of the United Nations. Cheng & Tsui's best-loved Chinese textbook series is new, revised, and better than ever!

This book teaches you the basic rules of English. It covers articles, adjectives, adverbs, counts, comparisons, questions, nouns, pronouns, possession, and verbs. If you are studying, traveling, or just interested in learning more about the language, this is a great place to start. [Written in Chinese]

This book lists approximately 4,800 core English words with standard Chinese (Mandarin) equivalents including standard American pronunciation.

Main entries are in English alphabetically with standard American pronunciation with focus on stressed syllable*in bold print.. In the next line, pasts of speech label ([n.] for nouns and [v.] for verbs) and the entry 's Chinese equivalents in Pinyin (Romanized standard Chinese pronunciation) followed by Chinese characters (both simplified and traditional if applicable). A syllable is part of a word that contains one vowel sound. In every word of two or more syllables, one syllable is stressed. It 's called 'stressed syllable'. The vowel sound in that syllable is louder, higher in pitch, and longer than the other vowel sounds in the same word. The contrast between stressed and unstressed syllables is very important because it helps to create the rhythm of English. The native English speakers rely more on stressed syllable to understand what you say than on the individual sounds of the word. This book is ideal for learners of English as a second language who want to communicate more effectively and also for learners of Chinese who know English.
