Unlike animals, however, plants use energy from sunlight to form sugars during photosynthesis. In addition, plant cells have cell walls, plastids, and a large central vacuole: structures that are not found in animal cells. Each of these cellular structures plays a specific role in plant structure and function. [Link to Learning](#)

Incorporate botany in your classroom with these lessons and printables on trees, flowers, ferns, molds, and mosses. There are science activities on plant cells, photosynthesis, pollination, and much more! From gardening to chromatography, you'll find fun ideas for Earth Day and Arbor Day.
