Using the chlorine family of polyatomic ions as a model, predict the name of the BrO 4 1– ion. 16. Identify the polyatomic ion in each of these ionic compounds. Write out the name and formula of the ions including their charges. a.

Polyatomic Ions

Polyatomic Ions Worksheet Answers Pogil explains this principle by introducing the concept of "virtual particles" which would be the atoms or molecules that no longer exist in the particle. They would not be affected by the surrounding or the particle, but the virtual particles would be in motion. They then follow the surrounding of the particle and enter a state that's similar to that of the particle with zero energy.
