The Reader's Guide to British History is the essential source to secondary material on British history. This resource contains over 1,000 A-Z entries on the history of Britain, from ancient and Roman Britain to the present day. Each entry lists 6-12 of the best-known books on the subject, then discusses those works in an essay of 800 to 1,000 words prepared by an expert in the field. The essays provide advice on the range and depth of coverage as well as the emphasis and point of view espoused in each publication.

### **Reader's Guide to British History**

"Shelby has her hands full managing her new agency where she hopes to put her mind-reading skills to good use. Her first case to track down money stolen from a bank leads her into the lingerie business where nothing is as it appears. She also finds plenty to keep her busy with the police department and Detective Harris. But all that pales in comparison to what she must do to help Uncle Joey, the local mob boss. He knows her secret and is determined to make her use it for his own purposes."--Back cover.

### **Assessing the 2019 European Parliament Elections**

This book is a step-by-step practical guide on how to achieve successful projects in EPC/turnkey contracting and construction. Mapping out the shape of a project, the book spells out where things often go wrong, where and why disputes arise, and how to avoid conflicts. It is a key reference point for all involved in the contract, making it attractive to legal practitioners, construction industry professionals, and government officials involved with these projects.

### **ASVAB Prep Plus 2020-2021**

Informed by and against the backdrop of the 2019 European Parliament (EP) elections, this innovative book provides a critical assessment of where Europe stands in terms of the quest to achieve democratic legitimacy. Since the 2014 EP elections, the European Union (EU) has experienced multiple crises, which arguably have undermined its legitimacy. The 2019 EP elections were hence seen as a crucial moment in the EU 's attempts to show resilience and regain trust. Using political science and legal frames of analysis, *Assessing the 2019 European Parliament Elections* provides an understanding and assessment of the current politico-legal framework, and its impact on European elections. Furthermore, using original data, it provides a timely examination of public opinion issue priorities and voting behaviour at the 2019 EP elections in eight countries. Given the critical conjuncture that the 2019 EP elections represent, this volume provides a key contribution to understanding both the dynamics surrounding the elections, as well as voters ' responses, and informs debates on European politics, for example, second-order elections, democratic legitimacy and political representation. This book will be of key interest to scholars and students of EU politics, public administration, European studies, European law, and sociology, along with practitioners in politics, journalism, and policy analysis.

A Shelby Nichols Adventure

First published in 1982. People care about places. Inhabitants demand more participation in the changes proposed for their local environments, activists urge greater protection of countryside and natural environments, decision-makers feel threatened by the antagonism aroused by their powers and plans. The essays in this book have been drawn together to discover what lies behind these expressions of concern and discontent. Valued environments are places for which people feel commitment and affection, places which support a sense of personal identity and well-being. The authors explore the character and constituents of valued environments asking how our experiences of environments may be enhanced. What is the impact of environmental change? How can the future be accommodated in both rural and urban environments without destroying their essential qualities? The reader will find substantive evidence from case studies of environments valued by inhabitants and outsiders which answer these questions. Examples are taken from wilderness areas, fenland, market towns and large cities, commercial streets and residential neighbourhoods, environments of the past and those imagined in science fiction. The essays are united in their focus on the meaning of places and landscapes. The subtle but highly significant role of valued environments is examined thoroughly in the book. It will be of interest to all who care deeply about their surroundings, reflecting perhaps some of their own experiences as well as conveying information about the environmental experiences of others. Students of geography, environmental planning and conservation should also find the book directly relevant to their interests in man-environment relationships.
