Factor a polynomial or an expression with Step-by-Step ...

Factor a trinomial having a first term coefficient of 1. Find the factors of any factorable trinomial. A large number of future problems will involve factoring trinomials as products of two binomials.

In the previous chapter you learned how to multiply polynomials.

Factoring polynomials by grouping When a polynomial expression involves four terms with no common factors, then grouping method comes handy. Organize the terms and then factorize the polynomials by applying the grouping method.
