Studyguide for Principles of Managerial Finance, Brief by Gitman, Lawrence J., ISBN 9780133546408

A Merger of Equals

Studyguide for Principles of Managerial Finance, Brief by Gitman, Lawrence J., ISBN 9780133740882

This book introduces corporate financial management, based on the basic capital budgeting framework and the time value of money. It focuses on theoretical formulations and correct application of financial techniques that will help improve managerial and financial decisions. Based on fundamental principles of accounting and finance like time value of money and after-tax, it introduces readers to real-world constraints and complexities in the two fields. Written in a simple and accessible manner. It can be read by students of finance and accounting courses, business professionals and general public alike.

Package consists of 0136124569 / 9780136124566 MyFinanceLab -- Valuepack Access Card 0321524136 / 9780321524133 Principles of Managerial Finance 032152523X / 9780321525239 Study Guide for Principles of Managerial Finance

Gitman's proven learning goal system—a hallmark feature of Principles of Managerial Finance—weaves pedagogy into concepts and practice, providing readers with a roadmap to guide them through the text and supplementary tools.

HR leaders and practitioners: master the financial analysis skills you need to become true strategic business partners, gain an equal seat at the table, and get boardroom and CFO buy-in for your initiatives! In this one-of-a-kind book, Dr. Steven Director covers everything mid-to-senior-level HR professionals need to formulate, model, and evaluate their HR initiatives from a financial perspective. Drawing on his unsurpassed expertise working with HR executives, he walks through each crucial financial issue associated with strategic talent management, including quantifiable links between workforces and business value, cost-benefit analyses of HR and strategic financial initiatives, and specific issues related to total rewards programs, including stock, stock options, and pension costs. Unlike other finance books for non-financial managers, Financial Analysis for HR Managers focuses entirely on core HR issues. Director helps you answer questions such as: How do you model HR's financial role in corporate strategic initiatives such as the introduction of a new product line? How do you select bonus drivers to send the right signals to managers (and uncover suboptimal hidden signals you might be sending now)? How do you design compensation packages that are fully consistent with your goals? How do you identify and manage pension-finance costs and risks that can dramatically impact the long-term financial health of the business? HR leaders and aspiring leaders are under unprecedented pressure to provide credible, quantitative answers to questions like these. This is the one and only book that will help them do so.

The first course in finance for finance and business majors has traditionally focused solely on managerial (or corporate) finance. Now, many schools are indicating a need to introduce these students - particularly the non-finance business majors - to the other two major components of finance - institutions and investments - in this first course but at the same level of rigor as traditional financial management texts. With PRINCIPLES OF FINANCE, Scott Besley and Gene Brigham begin with a discussion of the principles of financial systems and business organizations, and move on to valuation concepts and corporate decision making (managerial finance). They conclude with coverage of investment fundamentals. Key chapters may be covered in a one-term course or supplemented with cases and outside readings for a two-term course. Chapters are written in a flexible, modular format, allowing instructors to cover the material in their favorite sequence.

For introductory courses in managerial finance. Help students apply financial concepts to solve real world problems with a proven teaching and learning framework The Teaching and Learning System -- a hallmark feature of Principles of Managerial Finance, Brief -- weaves pedagogy into concepts and practice, giving students a roadmap to follow through the text and supplementary tools. The 8th Edition, Global Edition, concentrates on the material students need to know in order to make effective financial decisions in an increasingly competitive business environment. It allows students to make the connections between a firm's action and its value, as determined in the financial market. With a generous amount of examples, this text is an easily accessible resource for in- and out-of-class learning.

Finance is the study of value and how it is determined. Individuals, small businesses and corporations regularly make use of value determinations for making strategic decisions that affect the future outcomes of their endeavors. The importance of accurate valuations cannot be overestimated; valuing assets too highly will lead to investing in assets whose costs are greater than their returns, while undervaluing assets will lead to missed opportunities for growth. In some situations (such as a merger or an acquisition), the outcome of the decision can make or break the investor. The need for solid financial skills has never been more pressing than in today's global economy. The Fundamental Principles of Finance offers a new and innovative approach to financial theory. The book introduces three fundamental principles of finance that flow throughout the theoretical material covered in most corporate finance textbooks. These fundamental principles are developed in their own chapter of the book, then referred to in each chapter introducing financial theory. In this way, the theory is able to be mastered at a fundamental level. The interactions among the principles are introduced through the three precepts, which help show the impact of the three principles on financial decision-making. This fresh and original approach to finance will be key reading for undergraduate students of introduction to finance, corporate finance, capital markets, financial management and related courses, as well as managers undertaking MBAs.
