An electrical engineer is likely to deal with "probability" in each of several areas as follows: In the analysis of communications systems, one is frequently

concerned with
lower signal-to-
noise ratios
resulting in
"bit-errors",
false alarms,
etc. There is
then a need for
careful
positioning of
thresholds,...

applications.

Page 26/100

These notes
adopt the most
widely used
framework of
probability,
namely the one
based on Kol-

axioms of
probability.
The idea is to
assume a
