Gas Exchange Exam Style Questions 2

Exam-Style Questions: Gas Exchange. 1. a) (i) Give one similarity between the way in which oxygen from the atmosphere reaches a muscle in an insect and the way it reaches a mesophyll cell in a leaf. (ii) Give one difference in the way in which carbon dioxide is removed from a muscle in an insect and the way in which it is removed from a muscle in a fish.

Exam-Style Questions: Gas Exchange - S-cool, the revision...

the lungs are surrounded by the diaphragm and intercostal muscles feature of gas exchange how feature improves efficiency of gaseous exchange system many alveoli this increases the surface across which oxygen and carbon dioxide can diffuse the epithelium of the alveoli is very thin there are capillaries running over the surface of the alveoli (b) Table 4.1 describes some of the features of the mammalian gas exchange system.

Unit 2 The Variety of Living Organisms Gas Exchange...

Q.10. What is the exchange of gases? A.10. The exchange of gases is defined as the physical process, through which gases move passively by diffusion across a surface. Short Answer Type Questions. Q.1. Write the various modes of transportation of carbon dioxide in the blood. A.1. It is carried in the blood in three forms:
